

**KENTUCKY RIVER COMMUNITY CARE, INC.
REQUEST FOR PROPOSALS (RFP) FOR
KENTUCKY BEHAVIORAL TELEHEALTH NETWORK**

**NETWORK PLANNING, SYSTEM TECHNOLOGY SOLUTION AND
IMPLEMENTATION**

RFP Number 00

**Proposals Must Be Submitted No Later than 4:00 p.m. 28 days after the 465 is
posted to the RHC Pilot Program website.**

**Vendor Telephone Conference Call: 2:00 PM (EST) on May 23, 2011
(Conference Access Number 866-479-6576 Pin: 24948225*)**

For Additional Information, call:

David Mathews, Ph.D.
Director of Adult Services
Kentucky River Community Care, Inc.
PO Box 794
178 Community Way
Jackson, KY 41339

Larry Potter
Information Services
E-mail: larry.potter@krccnet.com
Phone: 606-436-5761 ext. 7288

E-mail: wmathews@aol.com
Phone: 606-666-9006
Fax: 606-666-5840

All proposals must be submitted electronically using e-mail in Microsoft Office format on the due date along with mail or courier delivered hard copies of one original and five copies and a signed transmittal letter also due by 4:00 PM on the due date.

Late Proposals Will Be Rejected

DATES TO REMEMBER:

May 23, 2011 2:00 PM
July 30, 2011
NOVEMBER 5, 2011

PRE-BID CONFERENCE CALL

Request for Proposal

NETWORK PLANNING, TECHNOLOGY SOLUTION AND IMPLEMENTATION *Kentucky River Community Care, Inc. on behalf of the* *Kentucky Behavioral Telehealth Network*

1.0 GENERAL TERMS

1.1. Location of Work - All work shall be performed, completed, and managed at selected locations in the state of Kentucky, the primary location of which is the contractor's normal work address, or if the contractor's primary work address is outside the state of Kentucky, work may be performed through electronic communication and visits to Kentucky River Community Care, Inc. (KRCC) and its partners in the Kentucky Behavioral Telehealth Network (KBTN).

1.2. Term of Proposed Contract - Kentucky River Community Care, Inc. (KRCC) intends to establish a contract with a performance period of 180 calendar days from contract award date.

1.3. General Responsibility - The successful contractor will provide all necessary tools, equipment, parts, supplies, labor and supervision to perform a Network Technology Solution of the Kentucky Behavioral Telehealth Network and Implementation of the Kentucky Behavioral Telehealth Network. All work/services are to be performed in strict accordance with Scope of Work.

1.4. Specific Responsibility - In performing and accomplishing the general scope of services, the specific elements include but by no means are limited to Scope of Work of this Network Planning and Technology Solution RFP.

1.5. Contractor's Compensation - Compensation to the contractor shall be based on specific price and/or rates identified in the Contractor's proposal or otherwise negotiated after the proposal acceptance.

1.6. Subcontracts - Subcontracting shall be allowed. However, all subcontracts and tasks to be performed by subcontractors must be approved by KRCC.

1.7. Pre-Bid Conference Call - On May 16, 2011 at 2:00 PM (EST) a one hour telephone conference call will be held to enable prospective bidders the opportunity to ask questions about the RFP.

2.0 PROPOSAL CONTENT AND REQUIREMENTS

2.1 Proposal Format - Submit one (1) original, five (5) copies, and one (1) e-mail copy with attachments readable by Adobe Reader applications of the proposal. Proposals shall not exceed twenty (20) pages, exclusive of resumes and exhibits. The terms Vendor and Contractor are used interchangeably in this RFP.

2.1.1. Table of Contents - The proposal will have a table of contents with page numbers and pages numbered throughout the proposal.

2.1.2. Introduction - Brief introduction which includes:

2.1.2.1 The Vendor's name and address;

2.1.2.1 Statement that indicates the proposal is valid for at least 90 days from the proposal submission deadline;

2.1.2.2 Statement that indicates the Vendor's willingness to perform the services described in this RFP;

2.1.2.3 Provide a detailed and precise discussion, including examples and/or documentation, of meeting requirements established in this RFP.

2.1.2.4 Proof of any other licenses and/or registrations as required for performing the work contained in this RFP.

2.1.2.5 A statement that all staff and other resources which are required to perform the services described in this RFP will be made available by your organization over the life of the anticipated contract;

2.1.2.6 Statement that the signatory has authority to bind the Vendor; and

2.1.2.7 Signature of authorized individual.

2.2. Vendor Profile (5 points) - Provide a table or chart that shows organizational structure, chain of supervision, decision authority, and communications. Include the respondent Vendors and any sub-Vendor or subcontractors.

2.3. Professional Qualifications (20 points) - Professional qualifications of the Vendors proposed Project Manager, other key personnel, and/or team members necessary for satisfactory performance of required services. Include all personnel that will actively be involved with performing the work, to include a listing of all subcontractors, if any, with an explanation of purpose. Individual qualifications are to address the following:

2.3.1 Describe your experience working with Universal Services Administrative Company or the Federal Communications Commission.

2.3.2 Describe your experience working with multi-facility healthcare organizations that have an extensive referral network of hospitals and clinics.

2.3.3 Describe any previous consulting experience with KRCC, the Kentucky Behavioral Telehealth Network, or any of the KBTN partners.

2.3.4 Describe any pertinent consulting experience with behavioral healthcare systems.

2.3.5 Describe your experience working in the field of telecommunications network planning, Technology Solution and implementation contracting.

2.4. Understanding of and Approach to Project (20 points) - Narrative submittal must address individual tasks and technical specifications as shown in the Scope of Work as to how they will be accomplished, make basic Technology Solution consideration recommendations and improvements, and where necessary, provide proposed or revised schedule for deliverables.

2.5. Understanding Privacy and Security Issues of Healthcare (5 points) -

Narrative submittal must address privacy and security issues that are associated with the network and individual tasks as shown in the Scope of Work.

2.6. Past Performance with Behavioral Health Organizations or Health Organizations (10 points) -

Past performance in last five (5) years on contracts in terms of cost control, quality of work, and compliance with performance schedules. Provide phone numbers and emails for the named individuals.

2.7. Past Performance with Organizations Other Than Behavioral Health or Health Organizations (20 points) -

Past performance in last five years on contracts with Government agencies (including FCC and USAC) and private industry in terms of cost control, quality of work, and compliance with performance schedules. Include a list of all contacts of similar services performed during the last two-(2) years, with name of Contracting Officer and/or Project Engineer for each contract. Provide phone numbers and emails for the named individuals.

2.8. Price Proposal (20 points) - Provide

pricing for network Technology Solution study and pricing for installation, operation, monitoring and assessment of services as indicated in 3.8 Implementation. . The Contractor should include as a separate estimate the cost for participating in Network Planning and Technology Solution, implementation and evaluation.

3.0 REVIEW OF PROPOSALS

3.1 Responsiveness - Prior to evaluation, each proposal shall be reviewed to determine whether or not it is responsive. Non-responsive proposals shall be eliminated and will not be evaluated. Factors that may result in a proposal being declared non-responsive are:

- Not providing evidence of meeting the Minimum Requirements.
- Substantive and material conflicts of interest which were not declared and/or were declared and determined to be significant enough that the KRCC requested the potential Vendor not submit a proposal.
- Substantive and material noncompliance to requirements of the RFP proposal submission guideline.
- Not providing a price, if applicable.

3.2 Evaluation Process - An evaluation committee consisting of KRCC employees and selected KBTN volunteers shall evaluate responsive proposals. Each proposal shall be independently evaluated by each member of the evaluation committee. The evaluation will be based on the evaluation factors and values stated in this RFP. Discussions, presentations, and/or site inspections, if held, may result in individual evaluation committee members changing their scores. Evaluation factors not specified in this RFP may not be considered.

3.3 Evaluation Factors - The evaluation factors and the maximum points for each are:

Vendors Profile	5
Professional Qualifications	20
Understanding of and approach to Project	20
Understanding of Privacy/Security Issues	5
Past Performance with behavioral health	10
Past Performance USAC/FCC and other clients	20
Price Proposal	20
Maximum Possible Points	100

3.4 Cost Evaluation Formula - The price proposal portion of the RFP with the lowest price shall receive the maximum points. The points allocated to each of the higher priced proposals shall be determined using the following formula: (Price of Lowest Cost Proposal) X (Maximum Allowable Points for Price)/Vendor's Price = Points

3.5 Discussions - As determined by the evaluation process, Vendors may be offered the opportunity to discuss their proposal with the evaluation committee and the proposal may be adjusted as a result of the discussion. Vendors may also be allowed to submit a best and final proposal as a result of the discussion.

3.6 Presentations - KRCC reserves the right to require an oral presentation. As determined by the evaluation process, Vendors reasonably assured of award may be afforded the opportunity to give an oral presentation. If so afforded, Vendors will be notified in writing of the presentation's requirements, date, time, location, and amount of time allowed for the presentation and/or questions and answer period. Time frames will be strictly enforced. The entire evaluation committee shall be present for oral presentations. All costs associated with an oral presentation shall be borne by the Vendor.

3.7 Site Inspections - KRCC reserves the right to require a site inspection. Site inspections may be required of all Vendors or limited to those that, as determined by the evaluation process, are reasonably assured of award. If so afforded, Vendors will be notified in advance. Reasonable costs associated with the site inspection shall be borne by KRCC and approved in advance.

3.8 Notice of Award - After award of Contract all Vendors will be issued a Notice of Award containing the name(s) and address (es) of all Vendors and the recipient of the contract.

3.9 Informal Debriefing - Any Vendor may request and receive an informal debriefing after the Notice of Intent to Award is mailed out. The debriefing shall be limited to the Vendor's proposal, concentrating on the areas considered deficient or inferior. The merits of other proposals will not be discussed.

4.0 SCOPE OF WORK - Network Planning and Technology Solution - I

The Scope of Work for this RFP includes the items listed in the Technical Specifications (5.0) and the Schedule of Deliverables (6.0). The information following under the

heading “Background” is to help the contractors understand the scope of work in the broader context of all projects.

4.1 BACKGROUND - Kentucky River Community Care, Inc. (KRCC), on behalf of the Kentucky Behavioral Telehealth Network participants, is in the process of planning for a Kentucky Behavioral Telehealth Network (KBTN). The KBTN project is part of the FCC Rural Health Care Pilot (<http://www.usac.org/rhc-pilot-program/>). The purpose of the KBTN is to enhance the ability of rural healthcare providers to utilize health information exchange and telemedicine technologies in order to improve access to health services. KBTN will accomplish this through the use of secure, reliable, and facile connections with postalized cost structures (or graduated cost structures if more cost effective) to all endpoints and with “net neutrality” (or a broadband network free of restrictions on the kinds of equipment that may be attached, on the modes of communication allowed, and where communication is not unreasonably degraded by other communication streams). To accomplish this vision, the KBTN must establish the network infrastructure to electronically connect providers, patients, payers, other healthcare organizations, and state agencies across Kentucky, including public and private organizations in rural and urban communities. This network must provide seamless connectivity, and support the existing videoconference dialing plan adopted by nearly 1,000 existing video conference endpoints, including healthcare, higher education, K-12, state government, and other video conference networks and sites in the Commonwealth.

Specifically, the goals and objectives of infrastructure development are to:

Goal 1: Carefully plan a Kentucky statewide rural health care network that links the existing statewide network of regional behavioral health providers with primary medical care providers and hospitals to improve access to a full range of medical care for persons with co-morbid medical conditions.

Objective 1.1: Develop plan for the creation of the KBTN by using network planning and Technology Solution Vendors and KBTN partners to identify strengths, weaknesses, opportunities and threats to a statewide partnership with health care, hospitals and behavioral health organizations.

Objective 1.2: Combine Network of Providers into a non-profit consortium to be known as Kentucky Behavioral Health Network modeled after similar successful networks.

Objective 1.3 Issue RFP’s for network Technology Solution engineering and telecommunications providers.

Goal 2: Design a Kentucky statewide rural telehealth network that seamlessly interfaces with existing state networks, makes use of existing capacity, in place resources, and technology, combined with the best of new technologies using a team of highly qualified consulting systems and telecommunications engineers.

Objective 2.1: Select and contract with a Technology Solution Vendors with special expertise in telehealth network technology solution strategies.

Objective 2.2: Using planning, systems improvement, telecommunications engineering, site visits and group process techniques work with KBTN partners on system specifications.

Objective 2.3: Contact the Commonwealth Video Conference network (CVC) to understand the statewide videoconference network design and approved dialing plan.

Objective 2.4: Develop contract requirements for broadband network services and solicit bids from vendors.

Objective 2.5 Enter into contracts for the acquisition, creation and installation, implementation of telehealth infrastructure and training to partners on telehealth system maintenance and use.

Goal 3: Establish a statewide telehealth network of behavioral health care providers linking them to each other, primary medical care, and specialty medical care resources that makes use of the national Internet2 network if necessary, when appropriate and available, utilize the Internet 2 infrastructure, insuring maximum available bandwidth for the benefit of those rural areas medically underserved.

Objective 3.1: Using specifications and information from the network plan, establish formal agreements, procedures, policies and protocols on the KBTN implementation.

Objective 3.2: Combine Network of Providers into a non-profit consortium

Objective 3.3: Use the KBTN to provide telehealth behavioral health services to at least 500 persons per month.

Objective 3.4: Use the KBTN to provide telehealth primary and specialty medical care health services to at least 500 persons per month.

Goal 4: Implement, train and develop policies, procedures and clinical protocols that guarantee a swift adoption of the new technology as a resource to all members of the provider network.

Objective 4.1: Write and implement policies and procedures that guarantee swift adoption of KBTN network using those developed and tested at other nationally recognized sites.

Objective 4.2: Training providers on the use of the network so access is simple and fast.

Objective 4.3: Maintain operational capacity of the network.

Objective 4.4: Devise clinical protocols to provide access to underserved rural areas as first priority for the KBTN.

Goal 5: Develop and Implement and plan for network self sufficiency and sustainability.

Objective 5.1: Determine how clinical reimbursement limitations for telehealth in Kentucky will impact sustainability.

Objective 5.3: Develop plan for the evaluation of the strengths and weaknesses and patient and provider satisfaction for the KBTN.

Objective 5.4: Produce sustainability plan using projections and estimates of service volumes to partners for long term sustainability.

Objective 5.5: Produce network utilization reports on a monthly basis to provide feedback about implementation self sufficiency and sustainability.

5.0 SCHEDULE OF DELIVERABLES

The objectives of this project will be executed in two steps. A Vendor or group of Vendors is being sought to assist with the Technology Solution and Implementation. Minimally this includes; assessment of current needs, defining functional specifications,

development of a network Technology Solution, and timeline for implementation based on the approved Technology Solution. Include implementation, installation and deployment of the network Technology Solution as approved.

Vendor will focus on the assessment of current network capabilities, the development of functional specifications and a comprehensive behavioral healthcare network Technology Solution for Kentucky. *Vendor* will begin with network planning and Technology Solution engineers contacting KBTN partners at each site. These engineers will analyze the existing networks, identify gaps and duplications in connectivity, and conduct a best practices study to determine the most effective solution for connecting behavioral health and healthcare providers statewide. This study ends with the development of documents and specifications for the telecommunications services.

Vendor then commences with the installation and deployment of the Technology Solution telecommunications network, as recommended by the functional and network Technology Solution engineers. This deployment will link existing networks, as well as create new connections to rural locations where no connectivity currently exists. It is intended for the KBTN to be powered through a broadband Internet connection enabling high-speed data transfer capabilities while maintaining quick access for users. To accomplish connectivity outside of Kentucky the network will use Internet2 (I2) to directly facilitate health information exchange and telemedicine applications by providing an effective medium for electronic data delivery to tertiary care facilities outside of Kentucky and ensure that telemedicine capabilities will be efficient and reliable. The complete KRCC FCC application may be downloaded at: http://www.fcc.gov/cgb/rural/rhcp_applications.html.

Item	Task	Deliverable	Due Date
5.1	Determine network functional requirements and existing behavioral healthcare network components	Written draft of network requirements, “as is” network status based on analysis of existing networks and data collected from KBTN participants, and identification of USAC qualified and non-qualified participants. Contractors may hold face to face, web-based meetings and / or teleconferences.	25 days after receipt of signed contract
5.2	Review of network requirements and existing behavioral healthcare network components	Written report of the network requirements and “as is” network status with forecasts of how the new network/service will operate, estimates of the economic information concerning costs. Contractor will solicit comments from all participants on the completeness of the report, revise as necessary and submit final document.	15 days after Task 1 due date

5.3	Draft recommendations for KBTN core network components	Written draft technical specifications and schematics describing the necessary network components to join selected partner networks with clearly defined central services, points of demarcation, privacy and security assurances, specific recommendations for the KBTN requirements, and recommendations for connecting and calculating usage for non-covered USAC entities.	30 days after Task 2 due date
5.4	Vendor Technology Solution plans	Written draft technology solution (should include at a minimum; best fit, risk, cost, knowledge of the industry and knowledge of Kentucky).	Due with deliverable from Task 3
5.5	Solicit participant feedback.	Written final technical specifications, forms and schematics of telecommunications provider. The specifications shall include the technical details of the network's capabilities.	30 days after Task 3 due date
5.6	Presentation to KBTN advisory board of all findings.	Meet with KBTN stakeholders to provide a verbal presentation and a written summary of all findings based on Vendor review and local review.	30 days after Task 3 due date
5.7	II Installation of Network	Coordination with Information Technology staff at each location and system build as required	30 days after Task 6
5.8	Going Live with KBTN sites	Training of KBTN personnel at each site	30 days after Task 7
5.9	Evaluation of Implementation	Examination of network operations	60 days after Task 8

6.0 TECHNICAL SPECIFICATION REQUIREMENTS

The technical specification requirement shall include but not be limited to discussions of:

6.1 Detailed Design - The contractor will prepare the documents to guide financial commitments which are required for building and implementation of the KBTN system. For each KBTN partner:

- 1) Using the list of KBTN partners attached to this RFP in the Form 465 Attachment; evaluate the exact physical address for each location to be served.

- 2) The availability and locations of the current and needed equipment must be specified for each location. If the end user requires a combined switch router specify and include in build costs as the point of demarcation.
- 3) The user applications that will be supported must be detailed at each location.
- 4) The capacity and performance of the system must be quantified.
- 5) Security and reliability requirements must be set forth.
- 6) Support for privacy and security must be specified.
- 7) Network management tools to support the network operations.
- 8) Contact the Commonwealth Video Conference network (CVC) to understand the statewide videoconference network design and approved dialing plan.
- 9) Access to the Internet for all partners through a dedicated Internet Gateway.

6.2 Dimensioning - Determine the minimum capacity requirements that will still allow the quality grade of service requirements to be met for each KBTN partner's connections.

6.3 Traffic Engineering - Estimate traffic path requirements on the existing networks such as the KPEN, KIH, KTHN and other existing networks of which KBTN may become a part to foresee traffic congestion or accommodate more traffic demand. Make a recommendation concerning MPLS or ATM for the Internet backbone and connection to the Internet2 backbone.

6.4 Survivability – Provide a discussion of network survivability which enables the KBTN network to maintain maximum network connectivity and quality of service under failure conditions.

6.5 External Factors - Identify external factors which may affect our project such as government(s) regulation, activities of competitors, and the current and projected availability of technology.

6.6 Technological risk – Identify if any recommended system components pose an ongoing risk to system failure because of the newness of the technology or the lack of availability of replacement parts or engineers for maintenance.

6.7 System Architecture - How will the KBTN partners interconnect? What elements will need to be built, what will need to be bought or leased? What will be the capacity of each connection? Graphically present this information in a systems map which meets USAC – FCC requirements.

6.8 Implementation - Establish a systematic review procedure to audit adherence to the detailed Technology Solution document. Acceptance testing should be included as a formal procedure to determine that the development is complete

6.9 Training and Cutover - The telecommunications vendor shall include a detailed schedule for user training to be completed before the cutover. Since it is likely that different KBTN partners will likely be brought onto the network at different times, several training sessions may need to be scheduled.

6.10 Evaluation - After the systems have been in operation for some time the contractor will assist in answering the following questions: Did the system achieve its operational objectives? Do the users find the system responsive and dependable? What was/is the financial performance? Did the project come in within budget? Are the operational expenses within budget? Were the financial benefits of the project realized? How does the actual load on the system compare to the projected loads?

6.11 Maintenance/Upgrading/Modifications/Replacement - In the event that the Evaluation identifies needs for modifications to the system the telecommunications vendor's responsibility for these costs must be identified. Maintenance costs and requirements need identification as part of the telecommunications provider specifications if they are beyond the usual pricing information specifications.

7.0 CONTRACT AND OPERATING PROCEDURES

7.1 Term of Price for Deliverables - The proposal should contain a statement that the price quoted and the deliverables involved are a Vendors offer for a three year (or more) period.

7.2 Payment Terms and Schedule - Payment will be made in installments scheduled according to the payment plan in the final contract as directed by the USAC/FCC Rural Health Care Pilot Project requirements.

7.3 Technical Support - KRCC wants assurances that the KBTN will be well supported by the contractors. This should involve response time criteria, user support and/or help desk support. Companies must describe its support desk availability, maintenance and service operations, and procedures used to expedite problem solving, as part of any agreements with KRCC.

7.4 Assurance Statement - Respondents must include an affirmative statement in their proposal that their response to this RFP can and will meet each of KRCC's requirements.

7.5 Legal Considerations - KRCC reserves the right to cancel this request for proposal (RFP) at any time for any reason prior to the contract signing. KRCC reserves the right to reject any and all proposals.

7.6 Liability Insurance Requirements - The contractor shall provide certificate of liability insurance to cover the services of, or the personnel provided under the terms and conditions of this agreement.

8. List of Sites (Please see Form 465 Attachment for site details)

465 App Number	3. HCP Name	6. Address Line 1	8. County	9. City	St	11. ZIP	27a. Eligible Entity? (Y/N)
