

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

500 Corporate Centre Drive
Scott Depot, WV 25560
(304) 201-5707
www.wvtelehealth.org

January 20, 2010

Dear Telecommunications Service Provider:

The West Virginia Telehealth Alliance (WVTA) is pleased to present this Request for Proposals (RFP) for Wide Area Network (WAN) telecommunications services and Internet access. The RFP is being issued on behalf of the WVTA and eligible health care entities as part of the Federal Communications Commission's (FCC) Rural Health Care Pilot Program (RHCPP). The purpose of this RFP is to receive proposals for establishing, installing and delivering services to more than 160 non-profit health care locations throughout West Virginia.

This RFP organizes these locations into eight buying groups, each seeking its own WAN and Internet services, plus additional sites seeking Internet only. The buying groups are as follows:

1. Community Health Network of West Virginia (CHNWV);
2. CAMC/Partners In Health Network (CAMC/PIHN);
3. Valley Health Systems Inc. (VHSI);
4. West Virginia United Health System (WVUHS);
5. University Health Associates (UHA);
6. Minnie Hamilton Health System (MHHS);
7. Princeton Community Hospital (PCH); and
8. Wheeling Hospital, Inc. (WHI)

We want to emphasize that service providers are not required to bid on all eight WAN group networks and may bid on WAN services and Internet services separately. The WVTA anticipates that it may be necessary and appropriate to award multiple contracts as a result of this procurement. Toward that end, the evaluation process will provide for a separate analysis of the cost effectiveness of bids for each of the eight separate regional networks and Internet-only sites. Respondents are encouraged to be creative and submit proposals that emphasize their particular company strengths.

This RFP is available by contacting me via phone or email. My telephone number is 304-201-5707 and email address is RFP@wvtelehealth.org. The RFP also will be posted on the USAC Rural Health Care Pilot Web Site at <http://www.universalservice.org/rhc-pilot-program/tools/search-postings-2009.aspx#WV>.

Prospective bidders are invited to an **RFP Pre-Bidders' Conference at the WVTA offices at 500 Corporate Centre Drive, Scott Depot, WV 25560 on February 4, 2010 at 10:00 a.m.** We request that prospective bidders notify me of your intention to attend the pre-bidders' conference so that we can insure we have sufficient meeting room accommodations. In addition, please note that the RFP contains a prescribed process and deadline for submitting questions to us in advance of the proposal due date.

RFP responses are due on **Wednesday, March 3, 2010 at 3:00 EST** and complete proposals must be submitted in the format prescribed in the RFP. Please submit one paper copy of the RFP response to me at the WVTA offices and one complete soft copy via CD-ROM or email at RFP@wvtelehealth.org.

Sincerely,

Jack L. Shaffer, Jr.
Technical Coordinator
West Virginia Telehealth Alliance

APPENDIX A: West Virginia Telehealth Alliance Rural Health Care Pilot Program
(RHCPP) Notification of Award Letter

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

1 General Information

This Request for Proposals (RFP) contains specific instructions for proposers regarding Wide Area Network (WAN) telecommunications and Internet services sought for the healthcare sites in this RFP. This Section 1 contains general information about the relationship between buyers and sellers and specific instructions related to the federal Rural Health Care Pilot Program (RHCPP), which is providing up to \$8.4 million in funding to support this project.

This RFP was developed after a successful Request for Information (RFI) process conducted during the spring of 2009. The RFI provided budgetary pricing and technical information to the WVTA which was used to help the buyers make decisions about the format and structure of this RFP. It is important to note that no priority consideration will be given to telecommunications service providers that responded to that RFI; all qualified telecommunications companies are encouraged to respond to this RFP regardless of whether they submitted an RFI response.

1.1 RFP Availability

This RFP is accessible by contacting the Issuing Officer, Jack L. Shaffer, Jr., by phone 304-201-5707 or via email RFP@wvtelehealth.org and requesting a copy. Or, you may download a copy online at <http://www.universalservice.org/rhc-pilot-program/tools/search-postings-2009.aspx#WV>. It's important that companies provide their contact information to the Issuing Officer so he can communicate important information about the RFP.

1.2 WVTA Background

The West Virginia Telehealth Alliance (WVTA) is a non-profit organization dedicated to advancing telehealth use and telemedicine capabilities throughout the Mountain State. Supporters of the WVTA include hospitals, rural health care centers, medical schools (West Virginia University, Marshall University, CAMC, West Virginia School of Osteopathic Medicine), physicians, mental health centers, local health departments, senior groups, consumers as well as AFL-CIO and the West Virginia Chamber of Commerce, and major telecommunications companies.

The WVTA's mission is to:

- Develop a statewide telehealth network infrastructure to enhance healthcare delivery with priority emphasis placed on rural medically underserved regions using telehealth/telemedicine technologies;
- Help rural locations have increased access to health care and supporting services while containing or decreasing healthcare costs;
- Aid in the dissemination of relevant information, training, and technical assistance to healthcare organizations and providers to assist them with the adoption, deployment and utilization of new and emerging telehealth technologies for patient treatment and care coordination;
- Increase the use of distance learning in public health and medical care;
- Help spur the use, transmission and exchange of electronic medical records; and
- Facilitate access to training for healthcare workers, medical professionals, and patient education in rural and medically underserved areas.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

1.3 Purpose of Procurement

This procurement is in the next step in a multi-phase process to establish a statewide telecommunications network so non-profit healthcare providers can better use telehealth services and applications. On February 10, 2009, the WVTA issued its Metro Fiber Build RFP in compliance with the RHCPP. It is anticipated that a subsequent RFP may include additional healthcare sites and connect disparate networks together before the end of 2010.

The purpose of this RFP is to seek interested and qualified companies to provide high-speed WAN services and Internet Access to more than 160 non-profit healthcare sites in West Virginia. Most of these sites (161) are organized into one of eight distinct buying groups, each seeking its own Wide Area Network (WAN) for the distribution of Internet and other healthcare applications. Hereinafter, such buying groups are referred to as WAN Groups and the members of these groups are called WAN Sites. The complete address and phone number of each WAN Site is contained in Attachment 1: Pricing Spreadsheets. The eight affiliated WAN Groups are:

1. Community Health Network of West Virginia (CHNWV);
2. CAMC/Partners In Health Network(CAMC/PIHN);
3. Valley Health Systems Inc. (VHSI);
4. West Virginia United Health System (WVUHS);
5. University Health Associates (UHA);
6. Minnie Hamilton Health System (MHHS);
7. Princeton Community Hospital (PCH); and
8. Wheeling Hospital, Inc. (WHI)

The WAN Groups may purchase bundled WAN and Internet services together or site-by-site Internet services separately. The remaining sites (55) are Independent Sites, unaffiliated with any of the WAN Groups. These Independent Sites seek Internet Access (Port and Transport) separate from the WANs, directly from their locations to an Internet Service Provider (ISP). These Independent Sites also are detailed in Attachment 1.

1.4 Issuing Officer

The Issuing Officer is the official point of contact with regard to this RFP and the subsequent procurement process. He is:

Jack L. Shaffer, Jr.
West Virginia Telehealth Alliance
500 Corporate Centre Drive
Scott Depot, WV 25560
Phone: 304-201-5707
Email: RFP@wvtelehealth.org

Dellicker Strategies is the technical consultant for this project and will be supporting the Issuing Officer through this process. Dellicker Strategies' contact information is:

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

Dellicker Strategies
1647 Ashley Court
Kutztown, PA 19530
www.dellicker.com

Mark Foster, Technical Consultant
Office: 717-697-0632
Mobile: 717-579-7135
Email: mfoster@foster-consulting.com

Kevin Dellicker, Project Consultant
Phone: 484-788-1221
Email: Kevin@dellicker.com

The WVTA Board of Directors is the final authority on all matters related to the issuance and execution of this RFP. Purchasing decisions will be made in accordance with Section 6 of this RFP at the WAN Group level (on behalf of the WAN Sites) and for Independent Sites. Hereinafter, buyers or groups of buyers with purchasing and contracting authority are referred as “Customers.”

1.5 RFP Schedule

Date	Action Step	See Notes Below
January 20, 2010	RFP Issuance Date	1
February 4, 2010	Pre-Bid Conference at the WVTA Corporate Office: 10:00 a.m.	2
February 19, 2010	Deadline for submitting questions for official response.	3
March 3, 2010	Proposals Due in Prescribed Format	4
March 9, 2010	Oral Presentations if requested by the WVTA	5
March 25, 2010	Best and Final Proposals due (if requested by the WVTA)	5
April 9, 2010	Notifications of Award Decisions	6

Note 1: See Section 1.1 for how to obtain a copy of this RFP.

Note 2: Attendance at the Pre-Bid Conference is strongly encouraged but is not mandatory. Whether a proposer attended the pre-bid conference will not be considered in the evaluation of proposals.

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

Note 3: Proposers are encouraged to submit questions to seek clarification of this RFP. The WVTA will attempt to answer questions to the best of its ability but reserves the right to refrain from answering questions that seek information that is already set forth in this RFP or any addenda which may be issued. In order to ensure that all proposers receive the WVTA's answers to the pre-bid questions, questions should be emailed to RFP@wvtelehealth.org by January 29, 2010. Additional written questions may be submitted until February 19, 2010 for a formal response. Telecommunications service providers should expect their questions to be answered in writing for the benefit of the entire group, without disclosing the identity of the questioners.

Note 4: Section 6 contains the required format and contents for proposals and Section 1.6 contains submission instructions. The WVTA reserves the right to reject and not consider any proposals that do not comply with these requirements.

Note 5: See Section 1.11.

Note 6: This date is a target date and subject to change at the discretion of the WVTA.

1.6 Proposal Submission

RFP responses shall be submitted to the Issuing Officer as follows: a) one (1) paper (hard) copy; and b) one (1) electronic (soft) copy via email attachment(s) to RFP@wvtelehealth.org. Be sure the electronic submission is complete and in a format compatible with Microsoft Word (for main RFP) and Excel format (Pricing Spreadsheets).

Important! The WVTA may discard any proposal that does not submit pricing in the required format of Attachment 1: Pricing Spreadsheets.

The WVTA is not liable for any costs incurred by a proposer in preparing or responding to the RFP, or attending any meetings associated with this RFP. This includes any or all subcontractor costs.

1.7 Subcontracting

Proposers are permitted and encouraged to partner with subcontractors to provide complete responses. However, proposers are subject to full disclosure of the identity and nature of the proposed subcontractor arrangements. This may include providing a description of each intended subcontractor and a statement of the work to be performed. Proposers are responsible for the subcontractors' performance as though the proposer was undertaking the work itself. The WVTA reserves the right to reject the proposer's proposed subcontractor(s) on the basis of legitimate business concerns.

1.8 Disclosure of Proposals and Treatment of Proprietary Information

The WVTA intends to distribute respondent's submissions to the WVTA Board Members, potential Customers and their affiliated consultants for the purpose of making purchasing decisions. All recipients of these submissions are expected to treat them as confidential to the RFP process subject to the provisions of this Section 1.8. Specifically, the Customers are not to disclose these submissions except to those people involved with the purchasing process and not with other telecommunications service providers.

Notwithstanding the above paragraph, all of the Customers will comply with any requirement by state or federal authorities to make information associated with this procurement available to the government or the public for inspection, including the company responses to this RFP. At minimum,

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

respondents should expect that their submissions will be made available to the RHCPP and the Universal Services Universal Service Administrative Company's (USAC's) Rural Health Care Division (RHCD) for review and compliance purposes.

Under no circumstances will the WVTA make guarantees about keeping submissions confidential or be held responsible for the disclosure of any proprietary or trade secret information submitted during this RFP process.

1.9 Economy of Preparation of Proposals

All proposals shall be prepared simply and economically, providing a straightforward, concise description of the proposer's ability to meet the requirements of the RFP.

1.10 Proposals are Encouraged for All or a Portion of this Procurement

Telecommunications service providers are encouraged to submit proposals that serve as many sites as possible that are included in this RFP, with or without subcontractor partners. Proposers who opt to submit proposals for less than all of the WAN sites must comply with the following conditions:

- Proposers are encouraged but not required to offer services to each WAN Group.
- Within a given WAN Group, proposers are strongly encouraged to offer services to each WAN Site. This is being specified to ensure that all sites receive service, regardless of location. Proposers that do not bid on all WAN Sites within a WAN Group do so at their own risk and will be at a disadvantage based on the evaluation criteria. Each WAN Group expects that all the WAN Sites will purchase services as a bundled consortium pursuant to this RFP. An important exception is for the limited number of WAN Sites seeking DSL or cable modem service. Since not all proposers can offer such services, it is acceptable to serve all but such designated sites.
- Within a given WAN Group, proposers may submit "bundled" WAN Transport and Internet Access offerings to present an attractive combined price, but proposers also must allow for separate (unbundled) provisioning of such services. In other words, a WAN Group may purchase WAN Transport services from one proposer and Internet Access from another.
- Proposers are encouraged but not required to offer unbundled Internet services to all WAN Group and Independent Sites. Internet only sites do not offer assurances that they will purchase services pursuant to this RFP so proposers should price the connections separately. Their purchasing decisions will be made independently and without regard to whether other Customers purchase services.

The WVTA, any WAN Group or Customer may award multiple contracts if deemed to be in the best interest of the organization(s).

1.11 Oral Presentation and Best and Final Offer

The WVTA reserves the right to review proposals and select finalists to make oral presentations for some or all of the Customers. In addition, the WVTA may conduct a "Best and Final Offer" process that memorializes answers to any questions raised during the oral presentation, makes any other desired clarifications and itemizes best and final proposed pricing.

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

The WVTA may opt not to require oral presentations or Best and Final Offers. If the WVTA chooses to use this process, the WVTA is not required to extend the invitation to participate in oral presentation or the best and final offer process to all of the telecommunications service providers submitting proposals.

Should any of the Customers execute a process pursuant to this Section, the respective Customers will evaluate the Best and Final Offers in lieu of the original submissions to make award decisions. The Customers explicitly state that price modifications are acceptable during this Best and Final Offer process.

1.12 Acceptance or Rejection of Proposals

The WVTA and the Customers reserve the right to accept or reject any proposal, at their discretion. Any submission that is deemed non-responsive, or does not meet the RFP requirements can be subject to rejection. Any deviation from the performance requirements or other terms of the RFP, informalities or defects, if in substantial compliance with the terms and intent of the RFP, may be accepted by the WVTA; however, any deviation, informalities or defects also may be grounds to reject any proposal. Any changes proposed by the proposer to the terms and conditions contained herein or any other deviation from the RFP must be clearly marked and identified in the proposal response. The WVTA also reserves the right to not award any contract as a result of this procurement.

1.13 Notification of Winning Proposer(s)

The winning proposer(s) will be advised of selection by the WVTA through the issuance of a notification of award letter that will be subject to successful negotiation and consummation of a mutually agreed upon contract. Unsuccessful proposers also will be notified by letter.

1.14 Contractual Obligations

Responders must demonstrate flexibility in the contracting process. If the selected proposer fails or refuses to promptly negotiate or execute a contract which is consistent with this RFP and the proposal, the Issuing Officer may, at his option, disqualify and reject the proposal, discontinue communications with the proposer, commence contract negotiations with any other proposer or subcontractor, or reject all RFP proposals. Additional information about contractual expectations related to this RFP is included in Section 4.

1.15 Insurance Requirements

The successful proposer will be required to comply with all applicable laws of West Virginia related to insurance, including applicable rules and regulations of the West Virginia Workers' Compensation Fund.

1.16 Prohibition against Gratuities

The proposer warrants that it has not retained or paid any company or person other than a bona fide employee working solely for the proposer or a company regularly employed as its marketing agent to solicit or secure the contract, and that it has not paid or agreed to pay any company or person any fee, commission, percentage, brokerage fee, gifts or any other consideration contingent upon or resulting from the award of the contract. For breach or violation of this warranty, the WVTA and/or the Customers shall have the right to annul any contract entered into with a proposer that is later

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

found to violate this section, without liability or to pursue any other remedies available under this contract or by law.

1.17 Regulatory Review Contingency

All contracts with winning proposers are contingent upon being reviewed and approved by the Universal Service Administrative Company's (USAC's) Rural Health Care Division (RHCD), specifically including the RHCD's and the approval of a sustainability plan by the Federal Communications Commission (FCC). The FCC has explained, "A primary goal of the Pilot Program is to ensure the long-term success of rural health care networks and to prevent wasteful allocation of limited universal service funds." FCC Order 07-198, ¶54.

1.18 Publicity Regarding this Project

News releases and/or other forms of publicity pertaining to this project must not be made without prior approval and coordination of the WVTA Issuing Officer or his designee.

1.19 Rural Health Care Pilot Program Regulatory Requirements

All proposers MUST COMPLY with all facets of the Rural Health Care Pilot Program.

1.19.1 Service Provider Identification Number (SPIN) and FCC Registration Number (FCCRN)

The proposer shall provide a valid SPIN number (Service Provider Identification Number), in the proposal submitted in response to this RFP or support a copy of its FCC Form 498 that has already been submitted to USAC. (See <http://www.universalservice.org/fund-administration/forms/> for more information.)

For proposers that intend to provide telecommunications services (as opposed to solely proposing to provide Internet Access service), the proposer must be recognized by USAC as a telecommunications common carrier. The proposer also shall provide the company's FCC Registration Number in its proposal. For more information, please visit: <https://fjallfoss.fcc.gov/coresWeb/publicHome.do>.

Each proposer also must certify that it is in good standing and not subject to "Red Light Status" with the FCC.

1.19.2 Compliance with FCC Timelines

Proposers must be willing to sign a contract, based on mutually acceptable terms, for the provision of agreed-on services on a timely basis in accordance with the timeline prescribed in this RFP and by the RHCPP. RHCPP timelines are shown in the Notification of Award Letter to the WVTA attached to this document as Appendix A.

1.19.3 Compliance with Invoicing Process

Proposers must agree to adhere to and fully cooperate with the following invoicing process prescribed by the Rural Health Care Pilot Program:

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

Step 1: The service provider will provide the Customer (and the WVTA if the WVTA is not the contracting Customer) with an invoice for telecommunications services based on a periodic billing system (monthly or quarterly, as defined in the parties' services contract). The information to be included on this invoice will be mutually negotiated by the parties and need to include but not be limited to the following information:

1. Name and address of each location that receives service.
2. Start and end date of service period
3. Description of services delivered
4. Charge per location – full amount, 15% amount to be paid by the Customer and the 85% amount to be invoiced to the Universal Service Administrative Company (USAC), the Rural Health Care Pilot Program administrator.
5. For any ineligible locations (not eligible for Rural Health Care Pilot Program funding), itemize the charge for location (the full amount must be paid by the Customer). The WVTA reserves the right to require the service provider to submit separate invoices for any ineligible sites.
6. A sum of the amount to be paid by Customer (15% of each eligible site's fee + 100% of the charges for ineligible sites).
7. The amount to be invoiced to USAC.

Step 2: The Customer will be fully responsible for payment of 15 % of this invoice amount (incurred costs) directly to the service provider.

Step 3: The WTVA is responsible for submitting the documentation of the 15% payment to the Rural Health Care Pilot Program. If the contracting Customer is an entity other than the WVTA, the Customer will be responsible for submitting proof of the 15% payment to the WVTA.

Step 4: The WVTA is responsible for uploading the service provider's invoice and proof of payment of the 15% amount for eligible sites (and 100% of the ineligible site charges) to USAC.

Step 5: The WTVA is responsible for generating a standardized invoice, in the format prescribed by the Rural Health Care Pilot Program for the remaining 85% portion of the charges for eligible sites as set forth on the service provider's invoice, and submitting this completed form to the service provider.

Step 6: The service provider must complete the certification on the standardized invoice and submit this invoice to the Rural Health Care Pilot Program.

Step 7: The service provider will receive payment of the 85% amount from USAC. The WVTA is unable to contractually agree to a time line for payment of the invoice amounts associated with the 85% portion of the charges for each eligible site because the time line is dependent on the outside third party that is integral to the invoice process -- USAC.

1.19.4 Audit Requirements

Each proposer agrees to cooperate with the WVTA in the event that the WVTA or any Customers is audited by USAC.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2 Statement of Work

This Section 2 is designed to communicate the intentions of the Customers that seek to purchase services pursuant to this RFP. Unless otherwise specified, each section applies both to WAN Sites and Independent Sites.

Proposers should review the response submission requirements in Section 5 and the evaluation criteria in Section 6 before responding to this section. If a stated requirement cannot reasonably be met by the proposer, the response needs to clearly state that and offer an explanation in accordance with Section 5.

2.1 Technical Requirements for Services

The technical requirements of this section have been reviewed and approved by potential Customers in this RFP. It lays out their intentions and should be viewed as the best expression of what the healthcare providers intend to buy.

Decisions about service parameters have been made by matching Customer needs against the results of the Request for Information (RFI) conducted during the spring of 2009. The RFI provided pricing and design information to the healthcare providers sufficient to make decisions for this RFP. As previously stated, no proposer is at a disadvantage in the bid evaluation process if it did not submit an RFI.

2.1.1 WAN Sites versus Independent Sites

Each location in this RFP is categorized either as a WAN Site or an Independent Site. Complete address and phone number information for these sites is included in Attachment 1: Pricing Spreadsheets.

2.1.1.1 WAN Sites

WAN Sites each seek to purchase WAN and Internet services bundled together as part of a buying consortium, their respective WAN Group. WAN Sites already have affiliations with each other and seek to fulfill a joint procurement process committing themselves jointly. This is why all the sites within each WAN Group are encouraged to be served together.

For this RFP, each WAN Group will operate distinctly from each other. Eventually, in a subsequent phase of this project, each WAN Group will seek to connect to each other WAN Group for seamless statewide service. But, that is a subject for a different RFP.

Within each WAN Group, each WAN Site seeks a single transport link from its location to the WAN. This WAN Transport link will be used to provide any-to-any connectivity for the exchange of healthcare applications and other information among WAN Group members, and to distribute Internet. Please see Figure 1 for a depiction of the WAN Group/ WAN Site scenario.

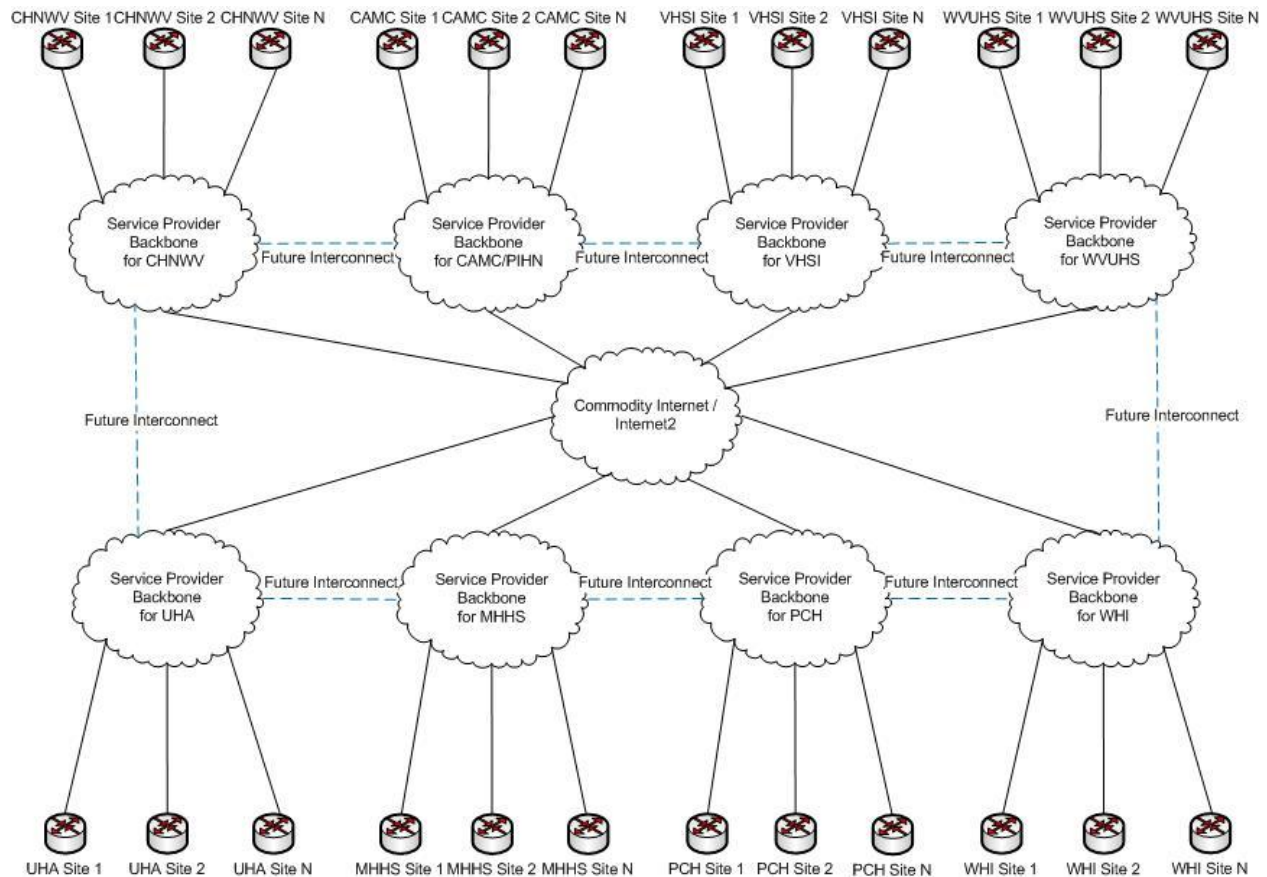

Important! As a fallback provision, the WAN Sites also seek unbundled Internet only proposals at various bandwidth options in case a particular WAN Group cannot purchase a bundled solution for whatever reason. In such a scenario, individual WAN Sites would still be able to purchase Internet Access independent of the other WAN Sites pursuant to this RFP.

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

2.1.1.2 Independent Sites

In addition to the WAN Sites, this RFP seeks services to Independent Sites. Independent Sites do not seek to be connected to a WAN and simply seek better Internet Access. They are not part of a purchasing consortium and their buying decisions are not dependent on any other sites. Independent Sites are not referenced in Figure 1. Some of the Independent Sites have indicated a strong commitment to purchase Internet Access based. They are shown in the Independent Site grouping IX in Attachment 1. Others (Independent Site grouping X in Attachment 1) will purchase if the pricing meets their budgetary restraints.

Figure 1: WVTA WAN Groups and Their Interrelationships (Source: WVTA)

2.1.1.1 Different Bandwidth Requirements

Each WAN Site and Independent Site has different bandwidth requirements due to variations in usage, size and budgets. For this procurement, these different requirements are specified on a site-by-site basis in Attachment 1: Pricing Spreadsheets. For most sites, these bandwidth amounts were chosen after careful consideration by the potential Customers of the anticipated costs for the various levels of service. Where a specific bandwidth was not identified, the potential Customers seek high bandwidth (10 Mbps) and low bandwidth (1.5 Mbps) options so the potential Customers may choose based on their individual requirements.

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

Proposers should note that these bandwidth levels are chosen to offer standardized speeds for comparison purposes. Proposers are free to propose alternative speeds in the “Proposer’s Choice” options. For example, if the RFP explicitly seeks service bandwidth of 10 Mbps for a given site, the proposer must offer service at that bandwidth, but also might propose service at 50 or 100 Mbps if the alternative speeds offer compelling value.

In a small number of instances, healthcare providers are seeking cable modems or DSL connections as their preferred service type, primarily due to cost considerations. Recognizing that some companies interested in responding to this RFP may not offer such services, companies are not required to offer service to those sites seeking cable modems or DSL connections or may propose a substitute technology.

2.2 WAN Site Services

This Section 2.2 and its subsections deal with the WAN Sites within the WAN Groups. Each of the WAN Groups seeks a single connection from each WAN Site to the WAN at the bandwidth specified in Attachment 1. Proposers must use Attachment 1: Pricing Spreadsheets to present exactly how each site will be served and how much it will cost.

2.2.1 WAN Transport Requirements

The specifications in this Section apply only to the WAN Sites and WAN Groups.

2.2.1.1 Transport Media Identified

Unless otherwise specified, the transport media for the links may include any combination of physical connections that meet performance, connectivity, speed and service level requirements of the Customers. For each location, proposers shall specify the medium that will be used to deliver service (fiber, licensed wireless, unlicensed wireless, carrier Ethernet over coax, etc.). This must be disclosed in Attachment 1. If using wireless links, proposers shall indicate the types of towers that will be used (lattice, concrete pole, rooftop mount, etc.) and the process for getting the required permits and licenses.

2.2.1.2 Transport Type Identified

Ethernet-based solutions are preferred for all WAN Groups. Traditional dedicated telecommunications circuits (i.e. T1s and bonded T1s) are acceptable, especially for connecting the lower-bandwidth WAN Sites to their respective WANs. In Attachment 1, proposers must identify the type of transport technology used to deliver WAN service.

2.2.1.3 Network Architecture and Diagram

Proposals may be hub-and-spoke, point-to-point, point to network cloud or whatever meets the Customers’ intent. Proposers shall describe the network architecture that is being proposed and provide a network design diagram. The network description must also explain how services will be delivered to remotely located sites.

Specifically, proposers shall indicate which sites will be served by existing equipment and facilities and which sites will require new builds in order to provide service.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2.2.1.4 Layer 3 MPLS Preferred

For each of the WAN Groups, a Layer 3 MPLS solution or equivalent is preferred unless layer 2 is explicitly requested by a WAN group. However, Customers may consider various degrees of Layer 2 and Layer 3 managed solutions depending on the value of the specific proposals to the WAN Groups. Proposers offering Layer 3 managed network services should disclose the following information:

- The specific type of Layer 3 solution; for example, Private IP, MPLS, Carrier or Metro Ethernet.
- Whether the service is capable of distributing WAN traffic, site traffic, Internet Access services and other transport channels directly through to each location.
- How the telecommunications service provider will ensure that services are available and used where needed.
- A description of equipment used to provide the Layer 3-to-Layer 2 handoff between the Layer 3 WAN and an associated Layer 2 organizational WAN (e.g. equipment manufacturer, model, additional interface modules, software feature set, etc.).
- A description of Quality of Service (QoS) capabilities and associated costs.
- How the telecommunications service provider will be able to segregate each entity's traffic, secure that traffic, and guarantee bandwidth, QoS, and individual Service Level Agreements on a common network.
- Describe any routing protocols (e.g. OSPF, EIGRP, BGP, etc.) that your design requires to be supported on the Customer's equipment.

If a provider is offering Layer 3 services, any additional costs for those services above the base Layer 2 costs should be clearly presented in Attachment 1.

2.2.1.5 Interconnectivity Addressed

The proposer must be able to accommodate existing transport technologies already being employed by Customers across their networks. Explain how your solution will support seamless interconnectivity among ATM, Ethernet, Frame Relay and other Layer 2 mechanisms. Explain how the solution will connect to another carrier's Ethernet service.

2.2.1.6 Integration with Existing Networks

The successful proposer must take into account that each of the WAN Sites have existing service in place and that existing circuits may be retained for a variety of reasons (Customer desire, contractual obligation, etc.). Proposers shall explain how their respective solution will integrate with the existing networks. Details of existing networks may be provided upon request and are to be treated as confidential information. Proposer is responsible for identifying technical solution and associated costs for interconnect between all existing sites within each specified WAN group as there may be sites with existing transport services that will not be replaced immediately. Vendors must identify the following:

- Detailed technical solution
- All associated costs, including but not limited to:

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

- All physical cross connect fees
- All port fees
- CFA

2.2.1.7 High Performance Applications

The WANs shall be designed to support high-performance, bandwidth-intensive, and interactive applications such as VoIP, H.323 voice and video, video over IP, interactive video conferencing, streaming video, graphical image exchange and two-way, real-time, high-definition video. Describe the extent that your service offerings can support such applications.

2.2.1.8 Location Additions

Proposers shall address how additional locations could be added if not specified up-front. In other words, can you accommodate new the WVTA member organizations seeking to join the Group WANs in the future with your initial technical design?

2.2.1.9 Bandwidth Increases

Proposers shall explain how the bandwidth of the last-mile transport links could be upgraded to higher bandwidth options as needs increase. The intent would be that only cards or SFPs/GBICs would need to be changed out in order to scale, not forklift upgrades that would require additional expenditures later. Also, proposers shall describe their respective ability to offer scalability to one site location independent of whether other sites on the WAN also upgrade at the same time.

2.2.2 WAN Site Internet Access

Each WAN Group seeks to purchase Internet services in bulk to be delivered via the WAN Transport links to the WAN Sites.

Two primary design models exist within the WAN Groups:

- 1) Some WAN Groups are electing to aggregate Internet bandwidth at one or more locations and control distribution of Internet bandwidth themselves. In this scenario, the proposer shall provide Internet Access of the specified bandwidth at WAN hub-site locations as noted in Attachment 1.
- 2) Some WAN Groups are electing to have the telecommunications service provider deliver Internet directly to each WAN site. In this scenario, the proposer shall provide Internet Access of the specified bandwidth for each of the identified locations requesting Internet service as noted in Attachment 1.

Internet may be delivered from the Internet Point of Presence (PoP) of your choosing. The quality of Internet service will be scored and evaluated.

As previously discussed, respondents that do not offer DSL service or cable modem services may offer alternatives to any specific WAN Site request for such service, or they may elect not to propose service to those particular sites.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2.2.2.1 Unbundling Internet Access

Internet Service Providers (ISP) may propose service that provides “bundled” WAN Transport and Internet Access to a given WAN Group. However, proposers also should be sure to allow for the “unbundling” of such services if the Customers want to purchase WAN Transport and Internet Access from separate companies.

In such a scenario, the responding ISP should deliver Internet to the hub-site location for each WAN Group, (Transport and Port) as identified in Attachment 1, without offering WAN Transport to each of the WAN Sites. The WAN Group itself then would be responsible for distributing the Internet through to each WAN Site via the WAN Transport services purchased by another company.

Generally, the preference is to buy both sets of services from one company; typically this “bundled” approach will be simpler, easier to manage and often costs less. Customers do not have to consider an “unbundled” option if they receive a cost-effective “bundled” solution that combines Internet Access with WAN Transport service together for a particular WAN Group.

In addition, all the WAN Sites seek to have a fallback position for Internet Service in case the WAN Sites cannot execute the entire WAN Group contract together. Attachment 1 lists all the WAN sites seeking unbundled Internet priced independently of any other site in bandwidth options of either 1.5 Mbps or 10 Mbps. Proposers may offer Internet service in any combination to these sites.

2.2.2.2 ARIN Coordination

For Layer 3 WAN proposals only, in coordination with ARIN, the successful proposer shall also be responsible for providing a scope of work and physical network connection diagram options for the health care centers. This is required in order for the telecommunications service provider and each entity to properly plan the physical “interface” of the WAN to each site. A scope of work to be provided to each connected entity must detail the responsibility of each Site and the network provider for final connections, IP address interfacing and configuration on the Customer’s equipment. It also must contain an acceptance plan to assure the Customer’s “individual” requirements are met. The bid price must include all labor and documentation and must include at least two on-site meetings to coordinate IP Planning and Addressing. Sections 2.3 and 2.4 contain additional guidance about these requirements.

2.3 Independent Site Services

This section and subsections apply specifically and only to the Independent Sites listed in Attachment 1. The Independent Sites are not affiliated with any particular WAN Group and therefore don’t require WAN Transport services. Rather, they seek Internet Access (Transport and Port) from their location to an ISP.

For this RFP, the Independent Site Customers will consider a high bandwidth option (10 Mbps Internet Transport and Port or as specified) and a low bandwidth option (1.5 Mbps Internet Transport and Port) for their Internet Access. Proposers may offer additional bandwidth options at their discretion (use the Proposer’s Choice Spreadsheets in Attachment 1 to present this pricing).

ISPs may bid on any Independent Site in this RFP and must price all Independent Sites separately from the others. These Independent Sites have made no commitments to each other about their

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

purchasing decisions and will evaluate each proposal individually to choose the level of service and specific provider that best meets their needs.

2.4 Additional Internet Access Requirements for All Sites

This section contains additional requirements related to Internet Access that apply to all WAN Sites and Independent Sites. It supplements the specific guidance provided in Sections 2.2 and 2.3.

2.4.1 Internet Transport Media Identified

Generally, the transport media for the Internet Transport links may include any combination of physical connections that meet performance, connectivity, speed and service level requirements of the Customers. ISPs must identify the transport medium for each link in Attachment 1.

2.4.2 Internet Transport Type Identified

Proposers shall describe the type of connection used to deliver and distribute the Internet service. This must be listed site-by-site in Attachment 1.

2.4.3 IPv6

As applicable, describe how you will ensure that equipment used in any Layer 3 Internet service offering will be capable of migrating to IPv6 in the future. Provide in the price the switch/router software that makes the equipment IPv6 “aware” so that future software upgrades are not required.

2.4.4 IP Addressing Assistance

For Layer 3 proposals to WAN Sites and for Internet Access service to Independent Sites, IP addressing, IP address space, IP ranges, IP address allocation, provisioning, and configuration are the responsibility of the telecommunications service provider, including all coordination with the health care centers, ARIN, the ISP, and with PSC/I2 (as applicable).

Please specify the minimum number of public IP addresses that will be available and provided for the use of each Site.

Describe how more public IP addresses could be made available, if required, by the health care centers. The ISP must agree to manage the public DNS entries for the WAN.

The successful proposer also shall be responsible for the collection of (via a survey form or other means) ALL current public and private IP addresses from EACH and EVERY health care center, including the current number of hosts and anticipated future hosts, and providing an ADDRESS PLAN for the new IP addressing scheme (and ranges) for each WAN and Internet Customer. This plan shall be provided to the Customer(s) for review and approval not later than two months before final implementation, and the successful Proposer shall also coordinate with the ISP and with the I2 POP for IP address coordination and allocation. The plan shall indicate if the individual health care centers shall need to change IP addresses on their interface equipment.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2.4.5 ARIN Assistance

For the Layer 3 proposals, the Proposer shall include assistance in the process with ARIN (if necessary) to request IP space allocation and ASNs. The Proposer shall provide his ASN number and the I2 POPs ASN number and IP block for successful coordination of the I2 routing scheme.

2.4.6 Bandwidth Increases.

Proposers shall explain how the Internet bandwidth can be increased as needs increase according to a set schedule of incremental per-Mbps pricing.

2.5 Additional Service Requirements for All Sites

This section and subsections also apply to all WAN Sites and Independent Sites.

2.5.1 Network Monitoring Capabilities

The provider shall proactively monitor its network using traditional network management systems found in a NOC (Network Operations Center). Network service operations shall be 24x7x365. Each WAN Site and Independent Site must have viewing and monitoring capabilities – at a minimum circuit utilizations statistics for individual links through the Network Operations Center (NOC).

2.5.1.1 Monthly Utilization Reports

Monthly utilization and trouble reports are to be made available to the WVTA and its designees. Please describe or provide samples of monthly utilization reports.

2.5.2 Performance Service Level Agreements

A Performance Service Level Agreement (SLA) sets forth standards of availability for WAN and/or Internet services, provides standards of reliability for related provider-owned edge equipment ("Equipment") and states the methodology to measure the percentage of time the service is available for Customer use. If the standards set forth below are not met the Customers require service credits to be applied to the affected Customer on the ensuing monthly bill. SLAs will remain in effect for the duration of the Contract.

The SLA must apply to all data transmission and reception on Point-to-Point, Multi-point, VLAN and VPN circuits, and VPN applications. This SLA is not applicable to service degradation or disruption related to: (a) permitted maintenance windows/downtime; (b) outages on non-provider network elements; (c) acts or omissions of the Customer or its Authorized Agents; (d) result of malicious actions by a third party against the Customer or its Authorized Agents; (e) adverse behavior of Customer equipment, facilities or applications; (f) Acts of God, civil disorders or other acts beyond the reasonable control of the provider, such as acts of terrorism. As applicable to the services being offered, the performance standards in this Section are subject to an SLA:

2.5.2.1 Network Uptime

The proposer must be committed to providing the Customer maximum network service availability, from point of Customer premise connection through the provider's network to the destination point, either the Internet or other Customer premise location(s).

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

Uptime SLA for local loop connections must be 99.95% and for the core backbone 99.99%. Local loop connections are defined as those connections from the premise to provider's edge switch which resides on our core backbone network. For WAN services to WAN Groups, the core backbone network is defined by the network diagram attached as a part of the proposal. Local Loop downtime shall not exceed 0.05% in any given month (.365 hours), exclusive of permitted downtime. The basis for measuring network availability shall be based upon 30 days per month x 24 hours per day (720 hours). Downtime shall be defined as the network is unavailable for use by the Customer. Uptime must be continuously monitored and provider will provide monthly Uptime reports to confirm uptime for both local loop and core backbone components.

2.5.2.2 Permitted Downtime

Permitted downtime is planned maintenance and/or upgrades scheduled with the Customer, not to exceed nine (9) hours per year. Maintenance is typically done after hours or on weekends but always must be scheduled and coordinated with the Customer.

2.5.2.3 Network Bandwidth Availability and Performance

The provider must be committed to providing the Customers with 100% availability of the contracted Maximum Information Rate (MIR). However, it is mutually understood that anomalies in the network can occur that may be outside of provider's control (i.e., caused by a Third Party network issue or a Customer network configuration change). Therefore, both parties agree that network availability shall not immediately equate to downtime if the network anomaly is caused by Customer internal network. The Customer agrees to follow provider provided trouble-ticket reporting procedures and internal trouble shooting process prior to initiating a trouble ticket. The provider continuously manages and monitors its network on a 24 x 7 basis and will generate quality of service reports for the Customer, to be provided on a monthly basis (or more frequently when requested). Standard network reports include average daily bandwidth utilization, including bandwidth peaks and downtime.

2.5.2.4 Network Latency

The provider shall continuously and proactively monitor all aspects of network performance. The provider shall measure latency from the Customer hand-off (WAN Port on the Customer router) through the entire provider network to either the provider's hand-off to the Internet (provider's Internet port on router) or Customer premise termination point (WAN Port on router).

The provider guarantees a per circuit monthly average round trip latency not to exceed 25 milliseconds. A circuit is defined as Customer end point to designated monitoring server on the provider backbone.

2.5.2.5 Network Throughput

The provider shall guarantee a per circuit monthly average end to end throughput equal to or greater than 92% of the guaranteed bandwidth.

2.5.2.6 Jitter

The provider guarantees a per circuit monthly average end to end jitter of less than 2 milliseconds.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2.5.2.7 Packet Transmission

Packet transmission is based upon successful delivery of packets through the provider's fully-routed, native IP backbone. "Packet loss" is defined as those packets dropped due to transmission errors and/or router overloading within the provider network. The provider must guarantee a per circuit monthly average end to end packet loss of less than 0.1%.

2.5.2.8 Responding to Network Problems

The targeted response time for network problems shall be thirty (30) minutes and resolution time or Mean Time to Repair target shall be four (4) hours.

Provider field technicians shall be available for dispatch to work with NOC technicians to troubleshoot, diagnose and remediate anomalies and/or network issues. Any network anomalies reported by the Customer are to have a call back from the provider to the Customer within thirty (30) minutes to, (a) acknowledge the issue has been logged and, (b) provide current status. If no call back is received, the escalation process is to be engaged by the Customer. The provider needs to provide a minimum of two (2) severity levels for outages (i.e. "major" or "minor" outages). Major outages shall be defined as those where the MIR is $< \text{ or } = 50\%$, as averaged over a two (2) hour period. Minor outages shall be defined as those where the MIR is $> 50\%$. In extreme situations however, "minor" outages, defined as issues with no or little impact on performance or operations, take a lower priority in the service queue.

Standard Service Interval(s)

Service response intervals, minor outage, are:

- Maximum of thirty (30) minutes response/call back to reported issues or anomalies
- Maximum of two (2) hours to identify problem and report resolution.
- Maximum of four (4) hours to implement resolution after reported.
- Major Outage/Emergency Service Interval(s)
- In the unlikely event of a critical outage, service intervals are escalated to:
- Maximum of fifteen (15) minute response/call back to reported issues or anomalies.
- Maximum of one (1) hours to identify problem and report resolution.
- Maximum of two (2) hours to implement resolution after reported.

2.5.2.9 Service Outage and SLA Credits

Service Outage Time is defined as the total time in a month that a Customer's connection is unable to transmit or receive data due to core transport failure. Outage Time is measured from the time the provider opens a trouble ticket to the time a problem is resolved. Outage Time does not include outages of less than 60 seconds in duration, time attributed to a Customer's delay in responding to a provider request for assistance to repair an outage, or the following exclusions: failure of any components beyond the core routers/switches maintained by the provider; failure of any components the provider cannot correct because the Customer is inaccessible; force majeure events; the Customer's negligence or willful misconduct or the negligence or willful misconduct of others authorized by the Customer to use the data services, including without limitation, work repair or maintenance performed on Equipment located on the Customer's premises by persons other than the provider or provider-authorized technicians; outages due to scheduled maintenance.

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

- If the Outage Time is between 5 minutes and 60 minutes (1 hour), the Customer will receive a 1-Hour Service Credit for the affected circuit, excluding taxes or surcharges.
- For each additional outage of sixty (60) minute duration beyond the initial 60 minute outage hour, an additional 1-Hour of Service Credit.
- Three (3) or more outages on a given circuit of any duration of five minutes or greater in any 30 day period will result in service escalation and a Customer review meeting.

If the Customer has an Outage on a monitored circuit, the provider will automatically process and issue a Service Credit.

If a Customer has an Outage on a non-monitored circuit, the Customer must contact the provider Account Manager in writing within 30 business days after completion of the measurement period to request a Service Credit. Upon the provider's verification of the Outage Time, the provider will issue a Service Credit to the Customer's account.

Monthly Maximum - Service Credits issued in any month under this SLA will not exceed eligible a Customers' total monthly recurring charge for the affected circuit.

Yearly Maximum - The combined cumulative total of Service Credits issued during a contract year under this SLA will not exceed 100% of a Customer's annual contract for provider services.

2.5.3 Health Care Network Legal and Privacy Requirements

All networks transmitting EPHI (Electronic Protected Health Information) shall meet the requirements of 45CFR, Part 164.312(e)(1): Technical Security Mechanisms to Guard against Unauthorized Data that is Transmitted over a Communications Network. The Proposer will need to address the Network Transmission Security- 1996 HIPAA Act and Compliance. Specifically, providers must respond to the following:

2.5.3.1 Integrity Controls

Demonstrate how you will ensure integrity of EPHI; list administrative, technical and physical safeguards used to ensure the integrity and confidentiality of health information and to protect against security breaches and unauthorized use or disclosure of health information.

2.5.3.2 Encryption

Demonstrate that EPHI, when transmitted from one point to another over this private network or RWAN, will be protected in a manner commensurate with the entity's risk. This is an addressable specification per the regulations, and encryption may or may not be needed, depending on the entity's risk analysis.

2.5.3.3 Compliance with Laws

The Proposer shall state in the RFP response what security measures are provided to meet the 45CFR Transmission Security requirements, particularly related to Integrity Controls and Encryption. Please state in your RFP response what network and data integrity security measures you currently have in place, especially if any transmission is over the Internet or wireless media. Explain how you will segregate and secure EPHI data from other non-EPHI data from non-health care entities on the RWAN. These measures can be, but are not limited to: VLANs, SSL VPNs, IPsec VPNs, authentication, encryption, firewalls, intrusion prevention, NAC, access lists, etc. or use of other means, methods or combinations.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2.6 Project Plan and Schedule

It is anticipated that the all the various parties' contracts will be executed by April 30, 2010. The target start date for completion of installation and commencement of service delivery of WAN and Internet Access service is approximately July 1, 2010. Please provide a realistic timeline from the date of contract execution to project start date, including projections for turning up individual site head end connections and interval milestone dates. The project plan and schedule must note any and all contingencies that are based on third-party action, such as, for example (including but not limited to), obtaining pole attachment rights or permitting from local governmental authorities for installation of facilities.

Proposers shall discuss their capability for the following:

- Dedicated project management staff.
- Widespread availability of comprehensive staff and resources for coordination and implementation.
- Formalized methodology for planning and tracking project activities using industry-accepted project management methodologies.
- Regular project implementation status update reporting and coordination with the WVTA Management.

2.6.1 Network Testing and Acceptance Plan

The proposer shall provide a testing and acceptance plan, not later than two months before the actual implementation that will detail and certify the following, as relevant:

- Guaranteed contracted bandwidth of each WAN and Internet circuit and circuit speed,
- Guaranteed contracted bandwidth of the backbone and the backbone speed,
- Round trip latency for each WAN and Internet circuit;
- QOS is turned on and in place;
- Any-to-any communication and proper router configurations;
- Internet reachability;
- Proper IP addressing according to the approved IP addressing plan;
- Proper installation, and other appurtenant requirements the Customer deems necessary in order to assure that the network meets the technical requirements of this RFP.

The Testing and Acceptance Plan shall itemize the duties and responsibilities of the service provider and all Customers and establish a time line for user testing. Services will not be "accepted" by the Customer until a Testing and Acceptance Plan is approved in writing, and until the proper documentation has been submitted to show each site was accepted, witness tested, and signed off by the WVTA and each site's technology point-of-contact or responsible IS/IT administrator.

West Virginia Telehealth Alliance Rural Health Care Pilot Program- Request for Proposals

The test plan must include provisions to demonstrate that the contracted bandwidth of each transport link (WAN, Internet) is at least 92% or better of the contracted speed and bandwidth to each site; that the packet loss is less than .1%, and that round trip delay is less than 25 milliseconds. The provider shall provide all test equipment to test the circuits to each site; and provide any and all servers/equipment and test software to “load” each circuit with traffic to validate that the circuit can be loaded to at least 92% of capacity (unless overhead is lower). This test can be either intrusive, or non-intrusive, and will include a test suite that shall follow the RFC-2544 requirements for end-to-end testing. Be advised that invoicing for any site’s monthly recurring charges cannot commence until the testing is complete, documented on the approved test form, signed off, and approved by the WVTA and/or the Customers. Proposers shall include in the bid price all costs associated with fulfilling these testing requirements including labor, test equipment and all documentation.

2.6.2 Delivery Service Level Agreements

Due to the RHCPP timelines, strict adherence to a reasonable project schedule is required. At the discretion of the Customer, service providers may be asked to submit a Delivery Service Level Agreement (DSLAs) that makes the service start-date from the Project Plan (See Section 2.6) a contractually binding milestone. Penalties will be negotiated during the contract negotiation phase. Service providers must agree to provide one day of service credits for every one day late during the first month of delayed service. After the first month, the amount of the credit will double. Providers are encouraged to submit a realistic Project Plan in order to avoid such penalties.

2.7 Business Administration Capabilities

The WVTA intends to negotiate all contracts with successful proposers in conjunction with the Customers. The WVTA will require the cooperation and close coordination with the proposers to insure that the sites timely remit payment of their respective share of fees (the 15% share for eligible sites and 100% share for ineligible sites) to the WVTA so that the WVTA will be able to remit timely payment to the proposers.

2.7.1 Ease of Accounting

Proposers shall describe their capability to provide online or electronic billing. The proposer shall have the ability to generate separate bills and establish separate accounting for individual sites.

2.7.2 Billing Frequency

Proposers shall provide pricing for services based on quarterly billing of services for the upcoming calendar quarter. Alternatively, Proposers may provide pricing for services based on monthly billing of services. Billing frequency for payment of nonrecurring charges also shall be specified.

2.7.3 Dedicated Account Manager

Proposers shall provide a single point of contact (dedicated account manager/representative) for all issues under this contract who has experience with accounts similar to the scope of this RFP.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2.7.4 Adherence to FCC Rural Health Care Pilot Program Rules for Payment

Proposers must indicate their ability and willingness to comply with the invoice payment process as specified in Section 1.19.3 above.

2.8 Value Added Services

Proposers shall discuss how the proposed services can be used to benefit other rural health care providers in West Virginia in future network projects and not just the Customers in this RFP, in keeping with the USAC Rural Health Care Pilot Program.

2.8.1 United States Department of Health and Human Services (HHS) IT Initiative Compliance

Proposers should explain how proposed solution(s) comply with various HHS health IT initiatives:

Explain how the solution complies with the Pandemic and All Hazards Preparedness Act and is coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and

Explain how the solution will help the WVTA participants meet interoperability standards recognized by the HHS Secretary;

Explain how the solution will aid in the use of health IT products certified by the Certification Commission for Healthcare Information Technology;

Explain how the solution will help support the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;

Explain how the solution has used resources available through HHS's Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations; and,

Explain how the solution has coordinated with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how your solution provides access to supported networks to HHS, including CDC, and other public health officials.

2.9 Other Relevant Information

Proposers shall provide any other relevant technical information required to communicate your ability to provide the services requested in this RFP.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

2.10 Cost for Eligible Services

Proposers must use Attachment 1: Pricing Spreadsheets to present pricing for the various responses in a standardized format. Specific instructions for filling out the spreadsheet are included at the end of this document.

Proposers are required to separate monthly recurring costs (MRC) from one-time, non-recurring costs (NRC) attributable to the installation of the new service. Proposers that do not delineate the MRC versus NRC costs for each service to each site may have their proposal rejected.

For all services to all sites, the Customers seek two alternative contract terms to consider: a) 60 months and b) 24 months with three one-year optional renewals (without penalties). Proposers should clearly identify any additional costs for Layer 2 versus Layer 3 services in Attachment 1. The service start dates for all sites are listed in Attachment 1. For the bundled WAN Groups, each site has a specified bandwidth requirement. The bidder must submit cost data for each site at the specified bandwidth. For the unbundled Internet only sites and Independent Sites, the service provider should propose high bandwidth (10 Mbps or as specified) or low bandwidth of Internet Access for the Customer to consider.

For all sites, the proposers can offer alternate levels of bandwidth as “Proposer’s Choice” option, must explain why it is bidding a higher bandwidth option (i.e. if a site is requiring 10 Mbps of bandwidth and the bidder does not have fiber connectivity to the site, a copper solution such as a DS3 can be substituted).

2.10.1 Offer “Proposer’s Choice” Options as relevant

The intent of this RFP is to present the Customers’ intentions and allow the service providers to offer their best responses to meet the Customers’ needs. Sometimes, providers may be able to offer different approaches to meet these needs besides those anticipated in this RFP. Proposers are encouraged to be creative in their responses to this RFP.

For all sites and for all services, respondents may offer Proposer’s Choice options. For example, a respondent may propose a 45 Mbps DS3 instead of a 10 Mbps Ethernet circuit to meet an Internet Transport requirement if such a solution is more cost-effective for that provider. Customers may accept compelling Proposer’s Choice offerings but do not need to consider them or evaluate them for official scoring purposes if they receive what they need from the specifically sought responses.

2.10.2 Bundling/Unbundling of Services

Providers should discuss how “bundling” of services affects service cost. For example, if the Customer would purchase WAN Transport from one company and the Internet Access from a different company how would that affect the price for the services offered? As previously stated, all providers need to allow for the unbundling of WAN Transport and Internet Access within a given WAN Group.

2.10.3 Future Pricing

Please describe how the Customers would be able to buy additional services (i.e. more transport or Internet bandwidth) off the negotiated contract without re-opening the competitive procurement process. Proposers shall discuss their ability to accommodate the addition of new entities to the projects and the expansion of services after Customers are already under contract.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

3 Proposer's Qualifications

3.1 *SPIN*

Proposers shall provide the SPIN(s) that it intends to use to deliver the services pursuant to this RFP. If the proposer plans to use multiple SPINs, the proposer shall identify each SPIN and the services that will be billed under each SPIN. Proposers who have applied for a SPIN but do not yet have the SPIN at the time of submitting a proposal shall include evidence of applying for a SPIN.

3.2 *Project Experience*

Proposers shall discuss previous experience with projects of this type and magnitude. It is important that proposers clearly demonstrate where they have had projects of equivalent size.

3.3 *Company Financial Stability*

Proposers shall provide a current report of the company's financials. It is the proposer's responsibility to clearly label any proprietary information not subject to public review.

3.4 *Company Ownership*

Proposers shall discuss any planned changes in company ownership.

3.5 *Reference Accounts*

Proposers shall describe a brief summary of your company along with previous experience in the providing of telecommunications services to the health care industry. Please include three current references. The organizations may be contacted by the team without prior notice.

4 Other Requirements

This section contains additional contract-related requirements of all proposers.

4.1 Contracts

Proposers are required to submit a copy of their proposed contract terms and conditions as part of their submission. Upon being notified that the proposer's proposal has been accepted, the proposer must work in earnest with the WVTA to negotiate in good faith a mutually acceptable contract. The proposer must explicitly certify in its proposal that it understands that the WVTA will not accept the proposer's standard terms and conditions and requires good faith negotiation of mutually acceptable terms and conditions.

4.1.1 Existing Contracts

For any sites identified with start dates later than July 1, 2010 and under contract for services by the responding provider, the responding provider may allow that buyer to exit the existing contract and move to the new terms at the earliest convenient time.

Proposers shall discuss willingness to "buy out" any existing telecommunications carrier's termination/penalty costs to replace any existing services noted in this RFP.

4.2 Contract Structure

Due to the expected variation in proposed responses, the Customers may enter into contracts in a manner of forms:

- A single contract between the WVTA on behalf of all the Customers;
- Separate contracts for each WAN Group;
- Within a WAN Group, separate contracts for WAN Transport and Internet services;
- Individual contracts for each Independent Site;
- Combinations thereof.

Discuss your company's ability and willingness to accommodate each of these options and any pricing implications that would affect the Customers as they choose.

4.3 RFP and RFP Responses to be Incorporated into Contracts

Respondents should expect that this RFP, their responses to this RFP, including any "Best and Final Offers" and other related documentation, will be included as exhibits in the final contracts to clarify the parties intentions. The order of precedence will be the final contract, followed by the final responses to the RFP and then the RFP itself.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

5 Format of Response

Proposers MUST submit their responses in the format sought in this Section 5 or risk penalties during the evaluation phase.

5.1 General Instructions

Proposers shall address each numbered item in Sections 1, 2, 3 and 4. Valid responses are:

- a) “_____ has read, understands, and will comply.”
- b) “_____ has read, understands, and will not comply.”
- c) A descriptive response articulating an understanding and appropriate response where necessary or where the above responses are not relevant to the question/statement.

Unless noted, no response to a specific numbered item shall be considered as agreeing with the RFP requirements.

To respond, the proposer shall copy each numbered heading and respond to the stated requirement. The numbering of all responses must be consistent with the numbering outlined in Sections 1, 2, 3 and 4 of the RFP Proposal. The recommended approach is to use this RFP in Word format and simply address the numbered paragraphs page-by-page.

5.2 Organization and Presentation of Proposal

For consistency of Proposals, please submit all Proposals in the following format:

Letter of Transmittal - Include the proposer’s contact information

Executive Summary – A concise overview of the Proposer’s solution.

Tab 1. General Information. Proposer’s acknowledgement of each numbered paragraph in Section 1 of this RFP;

Tab 2. Statement of Work – Proposer’s response to each numbered paragraph identified in Section 2 of this RFP;

Tab 3. Proposer’s Qualifications – Proposer’s response to each numbered paragraph identified in Section 3 of this RFP;

Tab 4. Other Requirements - Proposer’s response to each numbered paragraph identified in Section 3 of this RFP;

Attachments – Please attach any additional information required to communicate your proposed solution. Do not attach the pricing to the main submission (See next Section 5.2.1)

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

5.2.1 Special Pricing Instructions

Attachment 1: Pricing Spreadsheets needs to be submitted separately from the main body.

For the paper submission, the pricing needs to be submitted in a separate sealed envelope with the identification of the proposer clearly marked on the outside (one envelope per provider is sufficient despite multiple proposals).

For the electronic submission, proposers simply can attach Attachment 1: Pricing Spreadsheet to the email containing the other submission documents provided that the pricing submission is separate and clearly marked. For the electronic submission, Attachment 1 must be in the proper Excel format.

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

6 Evaluation Criteria

This section discloses how and by what measure proposals will be evaluated and respondents will be awarded the business for the services sought in this RFP.

The Scoring Matrix in Section 6.3 lists the criteria that will be evaluated for each set of services to be purchased pursuant to this RFP and groups them into weighted categories. The criteria match the major numbered headings in the RFP, so respondents should be sure to address all the relevant sections. Note that Section 2.10 Cost for Eligible Services, as expressed in Attachment 1 Pricing Spreadsheets, is the most heavily weighed category, represent 40 out of a total 100 points to be assigned.

6.1 Evaluators

The West Virginia Telehealth Alliance ultimately is responsible for making final purchasing decisions. To execute that authority, the Alliance will create Evaluation Committees to score the proposals. Evaluation Committees will consist of representatives of the Alliance, the WAN Groups and the Independent Organizations as the Alliance appoints them.

6.2 Scoring

Each Evaluation Committee will score each qualified proposal for a given set of services using the Scoring Matrix in this section. Scoring shall be based on the evaluators' objective conclusions about the provider's final written response to the RFP. A Committee may elect to have each individual evaluator submit his or her own Scoring Matrix and average the responses. Or, the Committee may discuss the proposals together and submit a single Scoring Matrix that reflects the consensus views of the entire Committee. The Alliance will determine the approach at their discretion.

For a given set of services, the qualified proposer who meets all the mandatory specifications and attains the highest point score of all proposers in the Scoring Matrix (possible maximum score of 100) will be awarded the contract.

In keeping with the requirements of the RFP, price is the most heavily weighted factor and overall awards will go to the proposals with the most cost-effective solutions. The Customers explicitly reserve the right to choose higher-priced proposals that score higher overall than lower-priced proposals based on factors other than price.

Neither evaluators nor Evaluation Committees are required to submit Scoring Matrixes for every combination of services sought in this RFP.

Attachment 1

PRICING SPREADSHEETS AND INSTRUCTIONS

This section provides step-by-step guidance for correctly submitting Attachment 1- Pricing Spreadsheets. It is extremely important for proposers to follow these instructions to ensure the accurate evaluation of your responses. Proposers that do not follow this format may have their proposals discarded.

The spreadsheets are color-coded. Grey cells provide information for the respondents. Green cells need to be filled-in by the respondents. White cells are calculated automatically based on the respondent’s inputs.

Attachment 1 includes seven spreadsheets—three for the bundled WAN Groups and five for unbundled Internet Only.

- Response A is for bundled WAN Groups- 60 months;
- Response B is for bundled WAN Groups- 24 months;
- Response C is bundled WAN Groups- Proposer’s Choice;
- Response D is unbundled Internet Only- 60 months- High bandwidth;
- Response E is unbundled Internet Only- 24 months- High bandwidth;
- Response F is unbundled Internet Only- 60 months- Low bandwidth;
- Response G is unbundled Internet Only- 24 months- Low bandwidth;
- Response H is unbundled Internet Only- Proposer’s Choice.

A respondent may include as many Proposer’s Choice spreadsheets as necessary to accurately present pricing for creative scenarios. Instructions are the same for each spreadsheet except as explained below.

Column-By-Column Instructions

Column	Instructions
A	This is the site ID # to keep track of the locations.
B	This is the name of the parent healthcare organization seeking service to one or more sites. Unless otherwise noted, this organization will hold the contract with the successful proposer and will be paying the bills.
C	This is the name of the specific building seeking service.
D-H	This is the address and phone number of the location to be served. For the bundled Group WAN spreadsheets, each location is to be connected to the Group WAN. For the Unbundled Internet Only Spreadsheets, each location is to be connected to an ISP.
I	This is the start date for service. Note that some locations may seek to start at a later date due to existing service arrangements that are due to expire. All contracts are to be coterminous.
J	This is the total number of months that each site will be served under the coterminous contracts.
K	This is the amount of transport bandwidth sought in Mbps. For the bundled Group WAN spreadsheets, this is a specific amount of service (i.e. 1.5 Mbps) connecting the WAN Site to the WAN. For the unbundled Internet only and Independent Sites, this is the specified amount of transport from the location to the ISP.
L	Respondents should indicate the transport medium for the link (i.e. fiber, copper, licensed wireless, unlicensed wireless).

West Virginia Telehealth Alliance
Rural Health Care Pilot Program- Request for Proposals

M	Respondents should indicate the type of transport for the link (i.e. Ethernet, Frame Relay).
N	Provide the NRC for the transport link. Providers must disclose the actual NRC for installing the new service.
O	Provide the MRC for the transport link. For bundled WAN Groups, the preference is respondents to offer the same price for the same level of service, regardless of location and regardless of the number of months connected.
P	If there is any additional NRC associated with a managed network offering not already included in Column I's pricing, disclose it here (i.e. extra charge for Layer 3 option).
Q	Any additional MRC for managed network services.
R	This is the Internet port sought by the buyers. For the bundled WAN Sites, this is either specified site-by-site to be distributed by the respondent or to be delivered in bulk to a hub-site(s) for the healthcare provider to distribute. For unbundled Internet only/Independent Sites, this is either 10 Mbps or a specified amount of Internet port for the high bandwidth option or 1.5 Mbps Internet port for the low bandwidth option.
S	This is the NRC for Internet port only- the NRC for Internet transport should already be disclosed in Column I. For WAN Group hub-sites only seeking bulk delivery of Internet, our assumption is that the respondent will need to provide a separate Internet transport link to the hub-site as depicted in the network diagram in Figure 1 of the RFP. For those hub-sites only, providers should input the combined NRC for Internet transport and port in this Column.
T	The same instructions apply as Column N except this is the column for MRC.
U	Respondents must disclose any and all additional costs associated with the services they are offering. This includes all taxes and fees. At minimum, providers must disclose taxes and fees at current rates for all the specific services offered.
V	In this Column, respondents must disclose all the MRC for taxes, fees or additional charges not previously disclosed.
W	R is the sum of all NRC. It's calculated automatically.
X	S is the sum of all MRC, calculated automatically.
Y	T is the total project cost for all services, calculated automatically based on the number of months. Note that for bundled WAN Groups, there is a summary row that shows the total costs for all services for all sites. That's because those services are being purchased as a consortium. For unbundled Internet only/Independent Sites, there is no total row because all those locations will purchase services independently.
Z	This optional column is for respondents to offer any useful clarifying information.

Please check your math! Thank you for your interest in this RFP!
