

## NLAD Pre-Production Guide for Linking Representative IDs to Test Accounts

### Overview

Beginning Wednesday, July 17, service providers will be able to link a Representative ID to existing test accounts in the [pre-production](#) environment. Linking a Representative ID to test accounts has two purposes:

1. Allow service providers to link a Representative ID to test accounts in the pre-production environment, and
2. Prepare service providers to test the validations on a Representative ID that will occur when RAD is fully implemented later this year.

Service providers will need to use the specific Representative IDs below when linking Representative IDs to accounts in the pre-production environment. If service providers do not link these Representative IDs to their existing pre-production accounts, they will experience errors in the pre-production environment beginning the week of July 29.

### Test Representative IDs

The following table describes the Representative IDs available for testing and which response a service provider will receive from the system by attempting to link them to an account. There is no limit to the number of ETCs that can link a given Representative ID to an account.

Representative ID	First Name	Last Name	Status 7/16-28	Status week of 7/29 onward
AB1234567	Test	Kay	Active	Active
CD1234567	Test	Case	Active	Active
EF1234567	Test	Jones	Active	Locked
GH1234567	Test	Clear	Active	Locked
JK1234567	Test	Lyn	Unresolved registration errors	Unresolved registration errors
LM1234567	Test	Potter	Unresolved registration errors	Unresolved registration errors
PQ1234567	Test	Snapple	Locked	Locked
RS1234567	Test	Stake	Locked	Locked
123ABC456	Test	Blue	Invalid ID	Invalid ID
789DEF012	Test	Rodriguez	Invalid ID	Invalid ID
RS1234567	Test	Green	Invalid first/last name	Invalid first/last name
JK1234567	Test	Lee	Invalid first/last name	Invalid first/last name

## Expected Response by Status

The following table describes the response a service provider will receive when attempting to link a Representative ID of a certain status to an account or when attempting to submit a transaction with a Representative ID of a certain status.

Status	Expected Error When Linking	Expected Error During Transaction (UI)	Expected Error During Transaction (API/Batch)*
Active	n/a, successful transaction	n/a, successful transaction	n/a, successful transaction
Unresolved registration errors	Representative ID: Representative has unresolved registration errors.	n/a	repld: REPID_NOT_ACTIVE
Locked	Representative ID: Representative ID cannot be applied to new user accounts.	repld: Representative ID is not active.	repld: REPID_NOT_ACTIVE
Invalid ID	Representative ID: Representative ID not found.	n/a	repld: REPID_NOT_FOUND
Invalid first/last name	Representative ID: First Name, Last Name and Representative ID do not match.	n/a	n/a
Representative not linked	n/a	repld: Representative ID not linked.	repld: REPID_NOT_LINKED

\*Please see the API Specifications for a full list of errors that a service provider may encounter related to the Representative ID fields when using an API ID.
