Nomination of Committee Chairs and Vice Chairs**

Action Requested

The USAC Board of Directors (Board) is requested to appoint a Nominating Committee (Committee) consisting of members of the Board for the purpose of soliciting nominations and recommending to the Board a slate of candidates for each of USAC's corporate officer positions, assisting the Audit, High Cost & Low Income (HCLI), Rural Health Care (RHC), and Schools & Libraries (SL) committees in identifying Board members to serve as committee chair and vice chair for each committee, and assisting committees in filling at-large seats.

Function of the Nominating Committee

USAC's By-laws require an annual election of officers to be held at the first quarterly meeting of the Board of Directors in any given year. At times, the Nominating Committee is appointed and called upon to meet off-cycle, as needed, to ensure key positions are filled.

At the October 25, 2016 meeting, the Board adopted a Nominating Committee Charter (Charter) to memorialize the Board's ongoing practice of appointing a Nominating Committee to assume certain responsibilities associated with the annual elections. As prescribed in the Charter, members of the Nominating Committee, including a Nominating Committee Chair, are appointed annually by the Chair of the Board and each member shall hold office until their resignations, removal by the Board, or until their successors are duly appointed by the Chair of the Board.¹ The Board appoints a Nominating Committee to assume the responsibility of: (i) soliciting nominations and recommending to the Board a slate of candidates for each of USAC's corporate officer positions (i.e., Board Chair, Vice Chair, Treasurer, Secretary, Assistant Treasurer, and Assistant Secretary); (ii) assisting the Audit, HCLI, RHC, and SL committees in identifying Board members to serve as committee chair and vice chair for each committee; and (iii) assisting committees in filling at-large seats.²

Acceptance of USAC’s Enterprise Risk Management / Governance, Risk and Compliance Framework

Action Requested

The USAC Board of Directors (Board) is requested to review and accept USAC’s Enterprise Risk Management (ERM) / Governance, Risk, and Compliance (GRC) framework.

Discussion

The Vice President of the Enterprise Project Management Office (EPMO) will be responsible for managing the ERM and GRC framework for the organization and providing key inputs required for the USAC Executive Leadership team to make informed decisions for proper governance.

The proposed ERM / GRC framework is included as **Attachment A**. USAC’s process to assess and minimize risk is included as **Attachment B**.

Attachment B
Annual Review of the Effectiveness of USAC’s Process to Assess and Minimize Significant Risks

Background

In accordance with the Audit Committee Charter, USAC management must evaluate the effectiveness of its process for assessing significant risks and exposures (collectively, risks) and the steps management has taken to minimize such risks.¹ The purpose of this paper is to describe how the organization plans to pivot from an audit-driven approach to risk management to a more holistic and proactive approach to risk management, and to evaluate the effectiveness of USAC management’s risk assessment process.

Risk management is the process of identifying and analyzing risks that affect the achievement of company objectives, and having controls in place to identify and mitigate significant risks

Historically, risk portfolios have been managed within separate lines of business, creating silos of activity like business risk, financial risk, and operational risk. However, regulatory requirements, accounting rules changes, and an evolving economic environment are encouraging compliance, financial, and operational risk stakeholders to collaborate across organizations. Organizations are now integrating portfolio strategies with other lines of business that affect the overall risk of the organization in a discipline called Enterprise Risk Management (ERM).

ERM is a discipline embraced by the organization that identifies risks from a broad scope and as an interrelated portfolio. The USAC Enterprise Portfolio Management Office (EPMO) team manages the ERM governance mechanisms that provide all inputs, including a comprehensive audit component, required for USAC management to make informed decisions for proper governance and the benefit of key operational initiatives.

USAC has adopted an “enterprise view” of risk management, which is a top-down mindset that has been embraced by each member of the Leadership team and within each of USAC’s business units.

¹ See USAC Audit Committee Charter, Section III, F., revised January 2018.

Risk Management Framework

In 2016, USAC created a cross-divisional ERM team that is now led by EPMO and includes members across all USAC programs and divisions. A primary focus of the ERM team is to identify the high risks that impact USAC’s key objectives/initiatives, address what is being done to mitigate those risks, and determine whether USAC is pursuing the most effective risk mitigation strategy. The ERM team assesses risk likelihood and impact on a monthly basis via internal risk registers and, on a quarterly basis, significant risks are escalated to the Risk Management Council (RMC). Risk discussions and related efforts are ongoing, and USAC will continue to engage the Audit Committee and the Board of Directors, as appropriate.

In 2018, USAC has made significant progress with maintaining and modifying the ERM program. As summarized below, USAC has established a redesigned framework to protect the Universal Service Fund. As part of this redesigned framework, we felt it important to have shared responsibilities and, therefore, shared accountability for the management of risk at USAC. To that end, the responsibilities defined in Office of Management and Budget (OMB) Circular No. A-123, Appendix A have been shifted to the Finance Division; program integrity has been made a greater responsibility of the program Vice Presidents; USAC has placed greater emphasis on compliance with the Federal Information Security Management Act (FISMA); and overall management of risk has been moved to the EPMO. *See Attachment A – ERM/GRC Governance and Framework.*

Summary

USAC no longer approaches ERM strictly as an audit activity. Consequently, USAC has determined it important to rearrange the risk identification activities within the organization and centralize the collection of these results and the oversight of the activities. To that end, the risk related activities have been reassigned within the USAC organization. The risk management processes used by USAC are designed to provide a framework in which risks are continually identified, evaluated, and managed. The ERM team and RMC has further leveraged USAC's ability to effectively manage risks. The implementation of various governance structures has furthered efforts to identify, detect, and protect the organization from damaging risks proactively. Accordingly, for the reasons described herein, USAC management has established and maintained an effective process for assessing significant risks and taking steps to minimize such risks.

ACTION ITEM

**Consideration of Approval to Reimburse Board Members to Attend an Event
Other Than a USAC Board or Committee Meeting**

Issue:

USAC Board of Directors (Board) policy requires that a Board member must request approval from the Board or appropriate committee for reimbursement of expenses for attendance at a non-USAC Board or committee meeting or event before any such reimbursement can be made.

Background – Analysis – Justification:

One or more Board members will be travelling to Washington, D.C. to discuss the 2019 annual budget with the Chief Executive Officer (CEO), the Chief Information Officer (CIO), and associated staff. The Board Chair, Mr. Joel Lubin, has requested that he, together with the Board Vice Chair, Mr. Joe Gillan, and the Board Treasurer, Mr. Ken Mason, participate in these discussions in person. Board members participating in the meetings may be reimbursed by USAC for any reasonable and customary travel expenses associated with this effort. In accordance with the *Procedures for Requesting Approval and Reimbursing a Member of the Board of Directors for Expenses Incurred in Conducting USAC Business other than Board of Directors Meetings* (see **Attachment A** to this issue paper), those Board members participating in the meetings will submit a USAC Form 3001 – *Request for Approval for a Board Member to be Reimbursed for Expenses Other than for Board Meetings* (see **Attachment B** to this issue paper) and will list estimated travel costs for their travel.

The procedures approved by the Board require that the reimbursement be directly related to the responsibilities of the Board in managing the affairs of USAC. These proposed trips are directly related to the business of USAC.

Current Topic: E-Gov Assessment

Briefing book excludes all materials discussed in Executive Session.

USAC has contracted with Guidehouse LLP (formerly PricewaterhouseCoopers Public Sector) to conduct our Digital Government Standards IT Assessment.

The Digital Government Standards IT Assessment will:

- Assess USAC’s framework of technology and staffing aimed at ensuring integration and efficiency in delivering on USAC’s Programs with primary focus in the following areas:
 - Business/Enterprise Architecture
 - Application/Systems Architecture
 - Data Architecture
- Find opportunities to remove inefficiencies and redundancies in business processes and technology to improve the program administration and digital services
- Develop a 5-Year Strategic Technology Plan that specifies actions to transform systems toward the recommended strategic architectures

Preliminary Milestones:

Current Topic: National Verifier Pre-Prod Strategy

Background

- Accenture developed USAC's National Verifier (NV) based on USAC requirements. System is built on top of the "Accenture Insights Platform".
- USAC owns the intellectual property (design, code, artifacts) of the NV application.
- NV production commenced with June 2018 soft launch. NV operated by Accenture and hosted in their FedRAMP cloud using licenses owned by Accenture.
- To motivate carrier acceptance, USAC requested Accenture to deliver and operate a "pre-prod" environment that closely emulates production. Carriers can test processes without committing transactions nor submitting live applications. Pre-prod environment commenced on 9/18/2018.
- Bottom line: NV has a strong dependency on Accenture services for development, support and operations.

USAC must mitigate the risk of such a strong Accenture dependency

- USAC will build a replica of the Accenture pre-production environment. The schedule is TBD.
- Required licenses and hosting services will be procured by USAC. Production support processes will be replicated as required.
- When complete, USAC pre-prod environment will become the official USAC pre-prod environment.

 - October 11 – Tropical Storm Michael: **Conduent** began providing operational SitReps three days prior to regional impact, addressing forecast awareness, day-by-day staffing and tactical impact projections, and mitigation strategies

- From program participants:
 - “I would like to thank you for what I see as a process improvement...to the Rural Health Care help line...I have had multiple occasions to talk with representatives such as LaQueca. She and the others seem well-trained and pretty knowledgeable. LaQueca and others have been able to step me through various situations and help me get to the right parties.”
