Appendix A: Glossary of Terms

Acronym	Term	Definition
NECA	National Exchange Carrier Association	Manages a part of the rural telecommunications revenue streams. Provides USAC with Part 36 data for High Cost Loop and CAF BLS support.
OMD	Office of Managing Director	Office of the Managing Director (OMD) is responsible for the administration and management of the Commission.
PMM	Performance Measurement Module	Collection of system functionality designed to deliver the requirements of the Performance Measurement Order.
PR / USVI	Puerto Rico / US Virgin Islands	Related to FCC Orders to assist in the rebuilding of the islands affected by recent hurricanes.
RBE	Rural Broadband Experiments	A 10 year program that provides \$100 million funding for carriers to buildout broadband services in high cost areas.
RDOF	Rural Digital Opportunity Fund	A new HC fund that will provide up to \$20.4 billion over ten years to finance up to gigabit speed broadband networks in unserved rural areas.
RoR	Rate of Return	Carriers subject to FCC rate-of-return regulation under legacy and CAF programs.
SAC	Study Area Code	A six digit unique identifier for carriers receiving High Cost support.
US Telecom	US Telecom	Trade association that represents telecommunications related businesses in the US.
WCB	Wireline Competition Bureau	The Wireline Competition Bureau works to ensure access to affordable communications for schools, libraries, health care providers, and works to ensure that all Americans have access to robust, affordable broadband and voice services. The Bureau is responsible for among other things, the rules and regulations related to the four federal universal service funds.

Universal Service Administrative Company High Cost & Low Income Committee Meeting

INFORMATION ITEM

High Cost Business Update Q2 2020 Update on High Cost Administration

Overall Summary

Despite the coronavirus pandemic, the High Cost Program conducted business as usual during the second quarter of 2020. The statewide mandatory stay-at-home orders emphasized the critical role of broadband in connecting Americans to everything from telemedicine appointments and virtual classrooms to teleworking. During the second quarter, the High Cost Division remained focused on implementing FCC modernization orders and driving the ongoing transition from legacy voice programs to the broadband-focused Connect America Fund (CAF) to close the digital divide in rural America.

During the second quarter, High Cost launched the second phase of the Performance Measures Module (PMM) to collect network speed and latency test data from carriers that receive CAF support to provide fixed-location broadband. High Cost conducted extensive outreach to CAF II carriers to help them navigate the first performance measures filing deadline in early May and prepared carriers for the annual July 1 filing deadline regarding the updates High Cost made to the FCC Form 481 filing system. Separately, the Division ramped up verification work to confirm deployment to a random sample of locations reported in the High Cost Universal Broadband (HUBB) portal as of March 1 by CAF II carriers and Alaska Communications Systems (ACS).

Finally, the Division continued development of a new system to support the Eligible Locations Adjustment Process (ELAP). ELAP is a voluntary challenge process to facilitate post auction review of the defined deployment obligations (and associated support) on a state-by-state basis when the total number of actual locations in eligible areas is less than the number of funded locations. This process allows CAF II Auction winners and stakeholders to submit evidence to adjust deployment obligations in eligible areas.

High Cost Program 2Q Highlights and Updates

FCC Order Implementation/Disbursements

- Continued to pay support for new modernized funds that shift carriers away from legacy cost-based funding mechanisms to model-based support with defined deployment obligations, including the Uniendo a Puerto Rico/Connect United States Virgin Islands (PR/VI) Fund, which will invest roughly \$900 million in robust fixed and mobile networks designed

to withstand storms in Puerto Rico and the Virgin Islands. HC issued payments to the first batch of mobile carriers authorized to receive Stage 2 PR/VI funding in June.

- Developed requirements to create maps of existing subsidized service areas for wireless eligible telecommunications competitive carriers (CETCs) receiving legacy High Cost support. These requirements will develop a framework for transitioning to the proposed 5G Fund for Rural America, which will invest up to \$9 billion over 10 years.

Systems

- Modified the FCC Form 481 filing system for the annual July 1 filing deadline.
- Launched the final phase of the Performance Measures Module (PMM) to allow carriers that receive CAF support to upload speed and latency test data from a random sample of subscriber locations reported in the HUBB.
- Collected and analyzed speed and latency data from Q1 pre-testing conducted by CAF II carriers.
- Continued development of a new system to support the Eligible Locations Adjustment Process (ELAP), which will allow CAF II Auction winners to submit evidence to support adjusting their deployment obligations in eligible areas where the total number of actual locations varies from the number of funded locations.

Compliance

- Continued redesigning and streamlining the CAF verification process, which confirms deployment to a random sample of locations reported in the HUBB. Process improvements include eliminating redundant steps, improving testing and reporting templates, and integrating more effective project planning to ensure prompt delivery of accurate 2020 verification results.
- Ramped up verification reviews for CAF II carriers, which faced an 80 percent buildout milestone as of the end of 2019; ACS, which faced 40 percent milestone; Rural Broadband Experiments (RBE) carriers, which have rolling milestones; and CAF II Action carriers that meet build-out obligations ahead of schedule.

Outreach

- Conducted outreach to help carriers navigate the annual July 1 filing deadline for FCC Forms 481 and 690 with updated training materials (how-to videos, user guide, etc.), multiple email communications (including communications about FCC waivers), webinars, and ongoing customer support to answer questions/troubleshoot problems.
- Conducted performance measure outreach to help CAF II carriers upload speed and latency pre-test data for Q1 into the PMM by the May 11 deadline (following system launch in early April). Activities included email

communications, webinars, and extensive collaboration with the product team and the FCC to respond to carrier questions, troubleshoot problems, and notify carriers about FCC waivers. Also worked with the FCC to set up Box accounts for carriers using a non-random sample for pre-testing.

- Created a new section for the verification webpage that explains the verification process for multi-unit locations (i.e. verification reviews will confirm that the number of actual units at a multi-unit location ties back to the number of units reported for that location in the HUBB) and provides samples of acceptable evidence (separate subscriber bills, images of home with multiple driveways or front entrances, etc.)
- Facilitated user experience testing with five CAF II Auction winners to support ELAP system development: Cincinnati Bell, BARC Electric Coop, ViaSat, GeoLinks, and Wind River Internet (tribally owned carrier).
- Prepared communications to wireless CETCs receiving legacy support requesting that they review maps of existing study area boundaries to develop 5G transition framework.

High Cost Upcoming 3Q Activities

FCC Order Implementation /Disbursements

- Issue payments in July to second batch of mobile carriers authorized to receive Stage 2 PR/VI funding.
- Prepare to implement the Rural Digital Opportunity Fund (RDOF), which will use a reverse auction to invest \$20.4 billion to expand broadband in unserved rural areas.
- Create maps of existing subsidized service areas for wireless CETCs receiving legacy High Cost support to develop framework for transitioning to the proposed 5G Fund.

Systems

- Close out remaining FCC Form 481 system modifications, including waiver-related issues, following the annual July 1 filing deadline.
- Launch state access tool to give state utility regulators and tribal officials access to deployment data submitted to the HUBB and financial and operational data filed on FCC Form 481.
- Refresh CAF Map with 2019 deployment data and new funds (CAF II Auction, Revised ACAM and ACAM II) in the HUBB.
- Continue ELAP system development.
- Continue to integrate new funds into the HUBB, with a focus on migrating existing locations already in the system and updating deployment milestone tracking for Revised ACAM and ACAM II and adding more eligible areas for CAF II Auction.

Compliance

- Continue verification reviews of 80 percent deployment milestone for CAF II carriers, 40 percent deployment milestone for ACS, and rolling milestones for RBE carriers.
- Conduct reviews of CAF II Auction carriers that meet build-out obligations ahead of schedule. The verification team is reviewing evidence and documentation submitted by carriers (e.g. phone bills, screen shots of service availability tools, engineering certifications, etc.) to substantiate deployment to a random sample of locations reported in the HUBB.
- Prepare for verification reviews starting in 2021 of ACAM carriers (which face a 40 percent deployment milestone as of year-end 2020) by reviewing fund requirements, updating or preparing new sampling plans, and ensuring adequate staffing.

Outreach

- Reach out to carriers to close out remaining FCC Form 481 filing issues, including issues related to FCC waivers that extended the July 1 filing deadline in certain circumstances.
- Reach out to state regulators and tribal officials about the launch of the state access tool to provide access to broadband deployment data in the HUBB and financial and operational data on FCC Form 481. Planning for email communication and webinars in partnership with National Association of Regulatory Commissioners (NARUC), FCC Office of Native Affairs and Policy (ONAP), National Congress of American Indians (NCAI), and National Tribal Telecom Association (NTTA).
- Reach out to state, local, and tribal officials and other stakeholders about CAF Map refresh with 2019 broadband deployment and addition of new funds.
- Continue outreach to CAF II carriers about performance measures pre-testing mandates in second half of 2020 and plan for outreach to ACAM, Revised ACAM, and RBE carriers about pre-testing in 2021. Develop guide to provide overview of vendors offering solutions to help carriers conduct speed and latency testing.
- Kick off outreach about verification reviews starting in 2021 for ACAM carriers (40 percent milestone) and CAF II Auction carriers that meet deployment obligations ahead of schedule. Verification outreach will include email communications, webinars, and industry presentations in partnership with trade groups (NTCA-The Rural Broadband Association, WTA-Advocates for Rural Broadband, Wireless Internet Services Providers Association and the National Rural Electric Coop Association) and continued updates to the verification webpage.
- Reach out to CAF II Auction carriers about the launch of new ELAP system to let them submit evidence to adjust deployment obligations. Develop new ELAP webpage, send email communications, and conduct webinar ahead of the first phase of the system launch.

- Reach out to wireless CETCs receiving legacy support to ask them to review maps of their existing study area boundaries to develop 5G Fund transition framework.
- Create new PR/VI and RDOF fund pages for USAC website.

ACTION ITEM

Consent Items

Action Requested

The High Cost & Low Income Committee (Committee) of the USAC Board of Directors (Board) is requested to approve the consent item listed below.

Discussion

The Committee is requested to approve the following item using the consent resolution below:

B. Approval of moving all *Executive Session* items into *Executive Session*:

- (1) **i2** – High Cost Business Update (*Continued*). USAC management recommends that this item be discussed in *Executive Session* because it involves *specific internal controls or confidential company data*, and *internal rules and procedures* concerning the administration of the universal service support mechanisms; discussion of the matter in open session would result in *disclosure of confidential techniques and procedures* that would compromise program integrity.
- (2) **i3** – Low Income (Lifeline) Business Update (*Continued*). USAC management recommends that this item be discussed in *Executive Session* because it involves *specific internal controls or confidential company data*, and *internal rules and procedures* concerning the administration of the universal service support mechanisms; discussion of the matter in open session would result in *disclosure of confidential techniques and procedures* that would compromise program integrity. This item also relates to USAC’s *procurement strategy and contract administration*.

Upon request of a Committee member, the above item is available for discussion by the Committee.

Recommended USAC High Cost & Low Income Committee Action

APPROVAL OF THE FOLLOWING RESOLUTION:

RESOLVED, that the USAC High Cost & Low Income Committee hereby approves discussion in *Executive Session* of the items noted above.

ACTION ITEM

**Approval of Low Income Support Mechanism
4th Quarter 2020 Programmatic Budget and
Demand Projection for the July 31, 2020 FCC Filing**

Action Requested:

The High Cost & Low Income Committee (Committee) of the USAC Board of Directors (Board) is requested to approve the 4th Quarter 2020 (4Q2020) programmatic budget and demand projection for the Low Income Support Mechanism for submission to the Federal Communications Commission (FCC) in USAC's July 31, 2020 quarterly filing.

Discussion:

On a quarterly basis, USAC is required to submit to the FCC each program's budget¹ and projected demand for the upcoming quarter.²

Funding Requirement

Based on projected subscribership levels, USAC estimates the 4Q2020 funding requirement for the Low Income Support Mechanism as follows:

¹ See 47 C.F.R. § 54.715(c).

² See 47 C.F.R. § 54.709(a)(3).

A comparison of actual expenditures to the budget for the six months ending June 30, 2020 is provided in **Attachment 1**.

Recommendation:

USAC management recommends that the Committee approve the 4Q2020 budget and projection of demand as proposed.

Recommended High Cost & Low Income Committee Actions:

APPROVAL OF THE FOLLOWING RESOLUTIONS:

RESOLVED, that the USAC High Cost & Low Income Committee approves a 4th Quarter 2020 Low Income Support Mechanism direct program budget of \$11.50 million; and

RESOLVED FURTHER, that the USAC High Cost & Low Income Committee directs USAC staff to submit a collection requirement of \$11.50 million for Low Income Support Mechanism administrative costs in the required July 31, 2020 filing to the FCC on behalf of the Committee; and

RESOLVED FURTHER, that the USAC High Cost & Low Income Committee, having reviewed at its meeting on July 27, 2020 the 4th Quarter 2020 Low Income Support Mechanism demand estimate of \$244.08 million, hereby directs USAC staff to proceed with the required July 31, 2020 filing to the FCC on behalf of the Committee. USAC staff may make adjustments if the total variance for the Low Income Support Mechanism is equal to or less than \$10 million, or may seek approval from the Committee Chair to make adjustments if the total variance is greater than \$10 million, but not more than \$15 million.

Lifeline Updates

- On Tuesday June 23rd, the Lifeline division marked an important milestone by fully implementing the National Verifier in all states and US territories where eligibility was previously reviewed by carriers.
- USAC has renewed its system connection and maintenance agreement with the Centers for Medicare & Medicaid Services (CMS) through September 2021.
- On May 25th, use of the Representative Accountability Database (RAD) became required.
 - This means that enrollment representatives must have a Representative ID, and that ID must be linked to a carrier in order to complete transactions in NLAD and the National Verifier. USAC also kicked off the RAD annual agreement process, which requires enrollment representatives to agree to the terms and conditions of USAC Lifeline Systems each year.

Upcoming Milestones

- Lifeline Risk Assessment and Program Evaluation underway, completion by year end:
 - Risk Assessment: Fulfills GAO's 2010 request.
 - The goal is to evaluate whether USAC's resources are structured to ensure that program goals are met in a cost-effective manner and that risks are appropriately targeted and addressed.
- Program Evaluation: Required by the 2016 Lifeline Order and 2015 GAO Report. The purpose of the evaluation is to provide the Commission and the public better information about the operation and effectiveness of the Lifeline Program.

Appendix A: Glossary of Terms

Acronym	Term	Definition
BPO	Business Process Outsourcing	Business Process Outsourcing to handle call center and manual application reviews for the Lifeline Program.
CMA	Computer Matching Agreement	The computerized comparison of records for the purpose of establishing or verifying eligibility for a federal benefit program.
O&M	Operations and Maintenance	Operations and Maintenance, refers to Lifeline systems work.
PII	Personally Identifiable Information	Information which can be used to distinguish or trace an individual's identity, such as their name, social security number, etc. alone, or when combined with other personal or identifying information which is linked or linkable to a specific individual, such as date and place of birth, mother's maiden name, etc.
RAD	Representative Accountability Database	A database, which was developed to register and monitor Eligible Telecommunication Carriers' representatives who perform transactions in Lifeline systems. The RAD tracks the representatives' activities to identify unusual, suspicious, and potentially inappropriate behavior, and restrict their system access where appropriate.
n/a	Recertification	Annual review of an existing subscriber's eligibility, which is due by his or her respective enrollment anniversary date.
n/a	Reverification	One-time verification of existing subscriber's eligibility, which is required as a state migrates into the National Verifier. USAC performs this function unless the carrier opts out and elects to perform this function themselves.

Lifeline Business Update Q2 2020 Update on Lifeline Administration

Overall Summary from Q2 2020

During this reporting period, the Lifeline division worked with the FCC to respond to Lifeline stakeholder needs during the pandemic. The FCC released a series of orders in March, April, and June 2020 as part of its COVID-19 response efforts to temporarily prevent involuntary de-enrollments, including non-usage de-enrollments, annual recertification, and reverification requirements. The FCC also temporarily adjusted the acceptable documentation guidelines for Lifeline income-based eligibility through August 31, 2020. In addition, the June Order allows carriers to immediately enroll Tribal consumers who reside on rural Tribal lands, who will have 45 days to return eligibility documentation, through August 31, 2020.

To further support consumers during the pandemic, USAC also began accepting recently expired driver's licenses or state identification cards from consumers when needed to complete a Lifeline application. USAC and the FCC also introduced a new capability allowing state agencies, such as state public utility commissions (PUCs), to obtain access to the National Verifier service provider portal to assist consumers through the application process. Such access provides state PUCs, which regularly assist consumers with filing an application through the consumer portal and by mail, a third option to help consumers with the application process. This feature was enabled as part of ongoing FCC and USAC collaborations with federal and state partners to promote the Lifeline program and ensure eligible low-income consumers have the information and resources they need to apply for and maintain their benefit during the pandemic.

On June 23, 2020, the Lifeline division marked an important milestone by fully implementing the National Verifier in all states and US territories where eligibility was previously reviewed by carriers. In addition, USAC has renewed its system operations and maintenance (O&M) agreement with the Centers for Medicare & Medicaid Services (CMS) through September 2021, which provides for automated eligibility verification for Medicaid recipients nationwide. USAC and the FCC also renewed and re-established computer matching agreements with several states to maintain database connections enabling automated checks against state Supplemental Nutrition Assistance Program and other available qualifying program data.

On May 25, 2020, use of the Representative Accountability Database (RAD) became required. This means that enrollment representatives must have a Representative ID, and

that ID must be linked to a service provider in order to complete transactions in the National Lifeline Accountability Database (NLAD) and the National Verifier. USAC also kicked off the RAD annual agreement process, which requires enrollment representatives to agree to the terms and conditions of USAC Lifeline Systems each year.

Q2 2020 Lifeline Program Updates & Accomplishments

- USAC and the FCC engaged a variety of federal agencies, including agencies that administer Lifeline-qualifying benefit programs, to provide materials and information regarding the Lifeline application and enrollment process, which will enable those agencies to raise awareness of the program and help the low-income communities they serve stay connected. For example, USAC reached out to more than 13,000 food banks and homeless shelters. We also held training sessions for consumer advocates and stakeholder groups nationwide to help them understand the program and share the relevant information with their clients.
- On May 13, 2020, USAC deployed system changes to allow state PUCs, state departments of health and human services, social services agencies, and other third parties approved by USAC to obtain access to the National Verifier service provider portal to assist individuals applying for Lifeline. This serves as an additional method to assist Lifeline consumers.
- Puerto Rico fully launched in the National Verifier on June 23, 2020, following deployment of a database connection.
- O&M agreement with the Centers for Medicare & Medicaid Services (CMS) renewed through September 2021.
- Reestablished the Computer Matching Agreements (CMAs) for Launch 1 states (Colorado, Mississippi, New Mexico, and Utah) on April 18, 2020. Extended the CMAs for Launch 3 states (Missouri, North Carolina, Pennsylvania, and Tennessee) on April 15, 2020.
- Deployed NV enhancements to the “address update” workflow in the NV and NLAD to streamline the process for validation of independent economic household verification checks through greater automation.

Planned Activities for Q3 2020

- An outside expert vendor will perform functional and usability testing of USAC public websites and Lifeline systems during 3Q2020. USAC hired an expert to perform accessibility testing with input from vulnerable populations, such as the elderly and persons with disabilities, including visual, auditory, physical, speech, cognitive, language, learning, and neurological disabilities.
- Continue partnership efforts with California, Oregon, and Texas, NLAD opt-out states, where the National Verifier relies on existing state eligibility and duplicate checking processes, to enable a full launch in the coming months.
- Work toward automated database connections with additional states. A database connection with Nevada was enabled on July 2, 2020. Database connections with Wisconsin and Washington were also enabled in July. The National Verifier

- currently has connections to eligibility databases with two federal agencies, 18 states, and one US territory (18 states and Puerto Rico).
- Per the 2019 Lifeline Order, USAC will implement required updates to USAC systems and processes surrounding recertification. Subscribers who previously passed a database check, but subsequently fail the automated eligibility check for annual recertification, are required to submit eligibility documentation. Implementation will be dependent on Federal Register publication for the exact effective date. USAC is tracking towards an early 4Q2020 implementation.
 - A Lifeline risk assessment is underway, with completion expected by year-end. It fulfills GAO's recommendation that the FCC conduct a risk assessment of the Lifeline program to evaluate whether USAC's resources are structured to ensure that program goals are met in a cost-effective manner and that risks are appropriately targeted and addressed.
 - A Lifeline program evaluation is also underway, and USAC is required to submit the findings to the Commission by year-end. The Lifeline program evaluation is recommended in the GAO's 2015 Report on the Lifeline program (GAO 15-335) and required by the 2016 Lifeline Order. The purpose of the evaluation is to provide the Commission and the public better information about the operation and effectiveness of the Lifeline Program.
 - At the end of the waiver period associated with the COVID-19 pandemic, resume reverification, recertification, and other processes and conduct outreach to carriers and subscribers.
