Re: Engineering Certification of Gigabit Technology and Coverage

Dear USAC Representative,

XYZ Engineering Company has reviewed the maps, designs and equipment specifications for the ABC Phone Company fiber network build-out in the 123 exchange of Anytown, USA.

I certify that they meet or exceed the CAF II performance requirements and have the capability of providing gigabit speeds for any CAF II eligible locations within these exchanges. All locations within Anytown, USA are covered by 123 exchange and the 100% fiber network capable of delivering up to 1 gig service. The fiber in this location was live and in effect by December 31, 2017.

If you have any questions or need additional information, please let us know.

Best regards,
