Introduction to High Cost Verifications

Connect America Fund Phase II Auction

Optional 20% Milestone Review
HOUSEKEEPING – WEBINAR PANEL

• The webinar panel is located on the right-hand side of the screen.

• Open the panel by clicking the orange arrow.

• Use the white arrows to open the sections in the panel.
HOUSEKEEPING - AUDIO

- Use the “Audio” section of your control panel to select an audio source.
- Choose one of the audio options:
  - Your computer's audio
  - Call in using an access code and audio PIN.
- The audience will remain on mute during the Q&A session.
  - Moderators will be facilitating questions.
HOUSEKEEPING – WEBINAR PANEL

• You can use the panel to view the presentation in full screen or window mode.

• We are not using the hand raise function.
HOUSEKEEPING – TECHNICAL ISSUES

• Use the “Sound Check” link and click question mark icon for audio help.

• Exit webinar, and click the "check system requirements" link in the event confirmation email to determine whether your computer meets the requirements to see and hear the webinar.

• If issues persist, call 877-582-7011 to troubleshoot with GoToWebinar.
HOUSEKEEPING – Q&A

• There will be a live Q&A session focused on today’s topics.

• Tips for submitting questions:
  • Use the “Questions” box in your webinar control panel anytime during the presentation.
  • Click the box with the arrow above the questions box to expand it and see all written answers.
  • Write in full sentences.
  • Ask one question at a time.
  • Ask questions related to webinar content.

CAF II Auction Program Overview

• 10-year support term (2017-2026)
  • FCC Order 16-64 released on May 26, 2016 brings support to areas that are currently unserved by broadband. This includes high-cost census blocks where price cap carriers declined support.
  • FCC Order 20-677 released on June 26, 2020; In this limited waiver FCC permitted Auction carriers to reduce Letter of Credit to one year of support once the optional 20% milestone is met.
  • Per DA 16-1363, recipients of Phase II model based support must file in the HUBB all qualifying locations to which they made broadband service available in the prior calendar year by March 1st of subsequent year. Additionally, carriers are not required to wait until the reporting window to certify deployment for the prior year and may submit milestone certifications when deployment meets or exceeds any milestone shown in the next slide.
  • Per §54.309 (a)(2) and §54.313 (a)(3), recipients of high-cost support are obligated to offer service packages at a price that does not exceed the applicable pricing benchmark established by the Commission.

Sharing Data Using Box
Preparing for Verifications
Testing Sampled Locations
Calculating Verification Results
Reporting Verification Results

Please visit https://www.usac.org/high-cost/resources/fund-verification-reviews/ for more information
Verification Process Overview: Purpose & Objectives

Purpose

• Uphold integrity of the CAF II Auction program by ensuring adherence to program rules and requirements.

Objectives

• Ensure that the company has met the optional 20% deployment milestone obligation with respect to the number of locations deployed

• For each sampled location record, confirm that:
  • The structure at the location is eligible for funding
  • The reported service address accurately corresponds with the reported coordinates
  • Available upload and download speeds meeting the relevant performance speed tier or higher
  • Qualifying service was deployed in time to meet the relevant milestone date
  • The actual number of units matches the reported number of units
  • A broadband service package is available that meets or exceeds the relevant performance tier
Verification Process Overview: Sharing Data Using Box

- Documents will be exchanged via Box, USAC’s secure file sharing platform.
- USAC does not make public any documentation received from the company.
- When sharing supporting documentation, please do the following:
  - Redact Personally Identifiable Information (PII) for any customers (customer names, phone numbers, SSN, etc.)
  - Supply only what is requested and which specifically addresses the requirements of the review
  - If necessary, you may password protect files
Verification Process Overview: Preparing for Verifications

1. By now, you have received an email from the Verification Team requesting that you complete and submit a process questionnaire and examples of supporting documentation via Box upload link.
   - This questionnaire helps the Team understand company’s processes for identifying and reporting deployed locations.
   - Verification Team will also analyze the example documentation provided and work with the company to make sure documentation is sufficient for verification purposes.

2. Company contact receives an email from the Verification Team, notifying them that the Announcement Letter and a spreadsheet containing the location records selected for the statistically valid verification sample are available for download in a new Box folder.

3. Company contact uploads documentation supporting speed, deployment date, and number of units for each location record in the sample to the same Box folder mentioned in #2.
Verification Process Overview: Testing Sampled Locations

• The Verification Team analyzes supporting documentation submitted by the company to verify that speed and deployment date for each location record in the sample is in compliance with program requirements. Additionally, the Verification Team will analyze company submitted documentation that supports unit count for location records with multiple units reported (Note: Each unit in a location record is considered a location).
  • If the Verification Team is unable to verify a location record, the Team will reach out to the company for an explanation or additional documentation.
• In addition, the Verification Team verifies that…
  • The reported address and coordinates for the location record correspond
  • The structure at the coordinates is eligible for support

No documentation from the company is requested for these items. If the team is unable to verify these items, the team will reach out to the company for more information.
Verification Process Overview: Reviewing Structure Eligibility and & Individual Units

Ineligible Structures
These structures will **not** pass review and **should not** be reported in the HUBB:

- Empty parcels of land, vacant structures that are condemned or are to be demolished or open to the elements
- Boats, recreational vehicles (RVs), tents, caves, and similar types of structure that no one is using as a residence
- Wireless infrastructure sites, such as cell towers
- The location of the network’s pedestal, box, or node
- Group quarters (dormitories, nursing homes, military installations, correctional facilities)
- Community anchor institutions (schools, libraries, hospitals, other medical providers, public safety entities, and community support organizations that facilitate greater use of broadband by vulnerable populations, including low-income, the unemployed, and the aged)

Eligible Structures
These **should** be reported in the HUBB:

- Residential locations
- Business locations (that company expects would demand consumer-grade broadband service)
- Locations to which service could be provided within 10 business days

Other key reporting guidelines:

- The latitude/longitude of location should be situated somewhere on the parcel of the location.
- Buildings with multiple units, such as an apartment building, must be reported in a single location record.
- If the units are in separate buildings, they must be reported in separate location records and thus contain unique latitude and longitude coordinates.

See [DA-16-1363](#) for more information on broadband location reporting
Verification Process Overview: Calculating Verification Results

• If a location record does not meet minimum speed requirements, was not deployed on time, and/or the structure was found to be ineligible, then the location record is deemed ineligible for support and not credited toward the company’s milestone obligation.

• If a location record’s unit count was found to be incorrectly reported, the company will not receive credit for the excess reported locations.

• The Verification Team deems the ineligible and incorrectly reported units, mentioned above, as failures.

• These failing locations found in the verification sample are extrapolated to the total population of locations that are eligible for testing (Note: no location records are removed from the HUBB portal by the Verification Team), then the company’s estimated passing locations are credited toward their milestone obligation. It is then determined whether or not the company is in compliance with their milestone obligation.
Verification Process Overview: Reporting Verification Results

1. Company contact will receive email from Verification Team, notifying them that their Verification Closure Letter(s), containing the results of the verification, is available for download in the Box folder.
   • If necessary, the company can request to have a conference with the Verification Team to discuss verification results.

2. Ten business days from the date of the Verification Closure Letter, the company is required to submit a response to the letter to the Verification Team in the Box folder. This response may be a simple message to state that the company agrees with the results of the verification or the company may dispute the results of the verification. Carriers can also provide additional documentation if such was not provided during the verification process. Note: Responding to the Verification Closure Letter is NOT a formal appeal.

3. Once the Verification Team receives the company’s response, the Team may provide a reply to the company’s response. The company’s response and the Verification Team’s response will be appended to the Verification Closure Letter and shared with the company and the FCC. (Note: No additional responses will be afforded to the company after USAC provides final response).

4. Carriers that are not in compliance with their public interest obligations during this optional milestone will not be considered to be in a compliance gap tier; however, they will be unable to reduce their letter of credit.
Supporting Documentation

Key Points to Keep in Mind

Common Documentation Types and Examples

Please visit https://www.usac.org/high-cost/resources/fund-verification-reviews/ for more information
Supporting Documentation: Key Points to Keep in Mind

- USAC reminds all companies to retain all records and analysis needed to demonstrate that universal service support is being used in accordance with High Cost Program rules (see 47 CFR Section 54.320(b)).
- To allow for unique differences between companies, USAC does not require any specific type of documentation (aka evidence) be submitted across all verifications.
  - For example, each company is not required to submit provisioning system screenshots specifically as part of their documentation.
- Supply only what is requested in the Announcement Letter and which specifically addresses the objectives of the review (i.e. verification of broadband speed, deployment date, and unit count (for location records with multiple units)).
- Companies may need to submit more than just one piece of evidence to support all objectives for a particular record in the HUBB portal.
- Redact Personally Identifiable Information (PII) for any customers.
Supporting Documentation: Key Points (Continued)

• Each piece of evidence must also contain information linking the displayed speed, date, or unit count to the specific associated location record(s).
  • Linking information could include things like customer address, coordinates, CLLI code or device name, etc.

• Each location record selected in the verification sample is assigned an item # in the Company Sample spreadsheet sent along with the Announcement Letter.

• In general, if an evidence file only applies to one location record, please include the item # in the file name when uploading verification files to Box.
  • Ex. “Item 17 – Subscriber Bill.pdf”
Supporting Documentation Examples:
Subscriber Bill

- Linking information Provided:
  - Full customer address

- Verification Objectives Supported:
  - Date where service was available
  - Broadband speed at the location
  - Specific unit denotation (if a separate bill for each unit is provided, then together they can support the total unit count for a multi-unit location record)

- Customer PII is redacted

**BILLING INFORMATION**

- Billing Date: 12/22/18
- New Charges Due Date: 1/09/19
- Previous Balance: $84.83
- Payments Received Thru 12/08/18: -$84.83
- Balance Forward: 0.0
- New Charges: $84.83
- TOTAL AMOUNT DUE: $84.83

---

**ADDRESS LINE**

- Customer Street Address
- Customer Unit Number/Unit Name
- Customer City, State, Zip Code

**Mailing Information**

MAIL TO:
ABC PHONE COMPANY
PHONE COMPANY STREET ADDRESS
PHONE COMPANY CITY, STATE, ZIP CODE
Supporting Documentation Examples: Provisioning System Screenshot

- Linking information Provided:
  - Full customer address
  - Coordinates
  - DSLAM CLLI Code

- Verification Objectives Supported:
  - Broadband speed at the location
  - Specific unit denotation (if a separate screenshot for each unit is provided, then together they can support the total unit count for a multi-unit location record)
Supporting Documentation Examples:
Public Facing Service Availability Tool Screenshot

- Linking information Provided:
  - Full customer address
- Verification Objectives Supported:
  - Broadband **speed** at the location
  - Specific **unit** denotation (if a separate screenshot for each unit is provided, then together they can support the total unit count for a multi-unit location record)
Supporting Documentation Examples: Engineer Certification

- Linking information Provided:
  - Device name
    - (would also need supplementary documentation showing which locations were associated with “123 exchange”)
  - Full license # and state where licensed
- Verification Objective Supported:
  - Broadband **speed** at the location
  - **Date** when service was available (should include month, day, and year)
Supporting Documentation Examples:
Construction Completion Sign-off Sheet / Acceptance Test

- Linking information Provided:
  - DSLAM CLLI Code
    - (would also need supplementary documentation showing which locations were associated with this DSLAM)

- Verification Objective Supported:
  - **Date** when service was available
    - (include completion date, signature, and sign-off date)
Supporting Documentation Examples: Released for Sales Email

• Linking information Provided:
  • DSLAM CLLI Code
    • (would also need supplementary documentation showing which locations were associated with this DSLAM)

• Verification Objective Supported:
  • Date when service was available
Supporting Documentation Examples: Evidence of Multiple Units

- Screenshots of a mapping software street view or satellite view that provide evidence of the number of units
  - Ex. Images showing two separate front entrances or two separate driveways (see images to the right)

- Screenshots from an apartment complex website, property tax website or real estate website (such as Realtor.com, Xome, Trulia, Redfin, etc.) showing the number of units

- Geotagged photos or video clips (taken using a mobile phone or camera with geotagging turned on) that provide evidence of the number of units
  - Ex. Images of separate electric meters or separate mailboxes
  - Please also include a screenshot of the file properties page for each picture or video that displays the associated latitude/longitude coordinates

Street Level Photo
- Shows two units — two entrances and two mail boxes.

High Altitude Photo
- Shows two units — two separate driveways and walkways that lead to two separate entrances.
## Verification Timeline and Next Steps

<table>
