National Lifeline Accountability Database (NLAD) v3.4.1 Release Notes

Updated Service Initiation Date and Anniversary Date Logic for Port Freeze Exceptions:

- When a subscriber goes through the port freeze exception process, the new provider will not inherit the subscriber's Service Initiation Date and Anniversary Date. The new provider will be able to enter in a new Service Initiation Date, and the system-generated Anniversary Date will be 12 months after the Service Initiation Date. However, the new provider will still inherit the same port freeze end date as the original provider as we have not updated the logic for the port freeze end date.
