Funding Requests

What is a Funding Request?

- Once a service provider is selected, the next step is for the applicant to submit a funding request to USAC to provide information about the services selected and certify that those services are the most cost-effective option of the offers received.
- Specifies the type of service(s) ordered, cost, name of service provider(s), and terms of the service agreement(s).
 - Examples of services include but are not limited to: circuits, equipment, network management, infrastructure
- Funding Request Forms:
 - Telecommunications (Telecom) Program – [FCC Form 466](#) (Funding Request and Certification Form)
 - Healthcare Connect Fund (HCF) Program – [FCC Form 462](#) (Funding Request Form)

Who must submit a Funding Request?

- **Telecom Program:** All applicants requesting funding through the Telecom Program must file a separate FCC Form 466 for each circuit for which funding is requested.
- **HCF Program:** All applicants requesting HCF Program funding must file a separate FCC Form 462 for each service provider for which funding is requested.
 - Multiple expenses can be included on one FCC Form 462 if it is for the same service provider.
- If you know you will have an upgrade during the funding year, this must be included in your contract and supporting documentation for the funding request. No changes can be made after the filing window closes¹.
- HCF Program applicants exercising voluntary extensions for an approved evergreen contract should list the remaining expense periods as one expense and the length of the extension as another expense.
- Telecom Program applicants exercising voluntary extensions for an approved evergreen contract would submit a second FCC Form 466 with a cover letter referencing the associated FRNs.

¹ The only changes that can be made are de-commitments if services are cut off during the life of a commitment, and/or site and service substitutions if the required language was included in the approved RFP.
