## 2018 FCC Form 499-A/Q True Up

1. The first step in the True-Up is to determine whether or not the company is de minimis for purposes of the A/Q True Up using the following formula:
(499A *.175000) - (499A *. 175000 *.149488).
a. If the result is $<\$ 10,000$, then the contributor is de minimis and any support mechanism charges billed to the filer ID for their four 499Q filings for 2017 are reversed.
b. If the result is $>$ or $=\$ 10,000$, then the contributor is NOT de minimis; continue to step 2.
2. The next step in the True Up is determining which FCC Contribution Factor and associated FCC Circularity Factor to use in the True-Up Calculation. After determining which factor is applicable, it will be used to replace the "Average FCC Contribution Factor" in step 3.
a. Average of 2 highest FCC Contribution Factors and the associated average FCC Circularity Factor should be used if (499A) > (Q1 + Q2 + Q3 + Q4).
b. Average of 2 lowest FCC Contribution Factors and the associated average FCC Circularity Factor should be used if (499A) < (Q1 + Q2 + Q3 + Q4).
c. Average of all 4 FCC Contribution Factors and the associated average FCC Circularity Factor should be used if $(499 A)=(Q 1$ + Q2 + Q3 + Q4).
3. Using the inputs noted above, the A/Q True Up formula for calculating necessary Support Mechanism Credits or Adjustments is:
a. (499A) - (Q1 + Q2 + Q3 + Q4) = True Up Base
b. (True Up Base * Average FCC Contribution Factor) - (True Up Base * Average FCC Contribution Factor * Average FCC Circularity Factor) = Quarterly Credit or Adjustment
c. Quarterly Credit or Adjustment / 3 = Monthly Credit or Adjustment
