2024 FCC Form 499-A/Q True Up

1. The first step in the True Up is to determine if the company is *de minimis* for purposes of the A/Q True Up using the following formula:

    (499A Contribution Base * .256).

    a. If the result is < $10,000, then the contributor is de minimis and any support mechanism charges billed to the filer ID for their four 499Q filings for 2023 are reversed.
    b. If the result is > or = $10,000, then the contributor is NOT *de minimis*; continue to step 2.

2. The next step in the True Up is determining which FCC Contribution Factor and associated FCC Circularity Factor to use in the True Up Calculation. After determining which factor is applicable, it will be used to replace the "Average FCC Contribution Factor" in step 3.

    a. Average of 2 highest FCC Contribution Factors and the associated average FCC Circularity Factor should be used if (499A) > (Q1 + Q2 + Q3 + Q4).
    b. Average of 2 lowest FCC Contribution Factors and the associated average FCC Circularity Factor should be used if (499A) < (Q1 + Q2 + Q3 + Q4).
    c. Average of all 4 FCC Contribution Factors and the associated average FCC Circularity Factor should be used if (499A) = (Q1 + Q2 + Q3 + Q4).

3. Using the inputs noted above, the A/Q True Up formula for calculating necessary Support Mechanism Credits or Debits is:

    a. (499A) - (Q1 + Q2 + Q3 + Q4) = True Up Base
    b. (True Up Base * Average FCC Contribution Factor) – (True Up Base * Average FCC Contribution Factor * Average FCC Circularity Factor) = Quarterly Credit or Debit
    c. Quarterly Credit or Adjustment / 3 = Monthly Credit or Debit
